This PRIIPS is authorized for marketing in France and regulated by AMF

KID published: 17/03/2023

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type: UCITS (Equities from eurozone countries)

Term: 5 years

Objectives: This key information document only sets out the objectives of the Ofi Invest ESG Euro Equity Smart Beta sub-fund of the Global SICAV fund. As the assets and liabilities of the SICAV's sub-funds are segregated, investors in each sub-fund cannot be affected by sub-funds to which they have not subscribed. Investors may not trade their shares in one sub-fund for shares in another sub-fund.

The Sub-Fund's management objective is to outperform the Euro Stoxx Net Dividends Reinvested index over the recommended investment period, by adopting an SRI approach.

The Sub-Fund's investment universe is defined by all of the EURO STOXX index's components. Using a dynamic allocation, the manager invests in the securities that make up the index for their universe without seeking to apply the same weighting to each security in their index, however. The Sub-Fund will mainly invest (90% of its Net Assets) in the eurozone, with no constraints on sector allocation.

Based on its investment universe, the manager makes quarterly allocations, or as required, depending on market conditions, sector allocations, based on the volatility of each composite sector and their connected relationships, in order to balance out their contributions to the overall risk (financial criterion) (If the composition of the benchmark universe changes between two quarterly rebalancings, the management team reserves the right, acting in the interest of unitholders, either to keep the securities until the next quarterly rebalancing, or sell them by temporarily rebalancing the portfolio, as permitted by the management process).

Alongside the financial analysis, as part of their study, the manager also analyses non-financial criteria in order to commit to a "Socially Responsible Investment" (SRI) selection of portfolio companies. The non-financial analysis or rating carried out will cover at least 90% minimum of the portfolio's securities (as a percentage of the mutual fund's net assets, excluding cash).

The manager applies an SRI filter to the components in each sector, so that only the top two thirds of companies with the best SRI scores for their sector, as established by the SRI team for the OFI Group, are kept (non-financial criterion).

Finally, each security is allocated sector by sector on a discretionary basis, within the constraints of the initial sector allocation (financial criterion).

The Sub-Fund may invest in financial futures or options traded on regulated and organised markets (French, foreign and/or over-the-counter). In the process, the manager may take positions with a view to hedging the portfolio against or exposing the portfolio to, on a discretionary basis, equity risks by using instruments such as Futures and Forwards on equity and equity indices, Options on equity and equity indices, and Swaps on equity and equity indices. The portfolio's overall exposure should not be more than 100%.

Investors will be able to compare the Sub-Fund's performance with the performance of the calculated Euro Stoxx Net Dividends Reinvested index.

Investors may subscribe to or redeem their shares on request from OFI INVEST ASSET MANAGEMENT (directly registered shares) or from SOCIETE GENERALE (by delegation by the Management Company for managed bearer and registered shares) every valuation day up to 12:00 (midday). Dividends are capitalized.

Intended retail investors:

This RF share class in the Sub-Fund is aimed at subscribers who subscribe via distributors or brokers (subject to national legislation prohibiting any retrocession to distributors, providing an independent advisory service within the meaning of EU Regulation MiFID II, providing an individual portfolio management service under mandate, or providing a non-independent advisory service when they have signed agreements with their customers stipulating that they may not receive or keep retrocessions) and who are looking to invest on eurozone share markets using a dynamic allocation. It is aimed at investors who are seeking long-term asset growth (5 years) and are willing to take major risks in order to achieve this objective.

The Sub-Fund is aimed at individuals who are sufficiently experienced and have enough financial knowledge to be able to assess the risks associated with the Sub-Fund's profile. Investors accept that they may lose some or all of their assets due to negative performances by their investment.

Insurance: The RF share in the Sub-Fund from Sub-Fund Ofi Invest ESG Euro Equity Smart Beta is be used as an account-unit vehicle for life insurance policies. The costs outlined below do not include the costs of the life insurance policy or any other package.

What are the risks and what could I get in return?

of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is the medium risk class; in other words, the potential losses from future performance of the product are at the medium level, and if market conditions were to deteriorate, it is unlikely that our capacity to pay you would be affected

This product does not expose you to any additional financial obligations or liabilities.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

The risk indicator assumes you keep the product for the recommended holding period. The actual risk can vary significantly if you cash in at an early stage, and you may get back less. The summary risk indicator is a guide to the level of risk

Performance Scenarios

Scenarios		1 year	Recommended Holding Period
Stress scenario	What you might get back after cost	4928.00 €	1706.23 €
	Average return each year	-50.72 %	-29.79 %
Unfavorable scenario	What you might get back after cost	8041.34 €	4768.79 €
	Average return each year	-19.59 %	-13.77 %
Medium scenario	What you might get back after cost	10651.64 €	13857.91 €
	Average return each year	6.52 %	6.74 %
Favorable scenario	What you might get back after cost	14424.41 €	16811.14 €
	Average return each year	44.24 %	10.95 %

This table shows the amounts you could get back over the recommended holding period, according to various scenarios, assuming you invest EUR 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios for other products.

The scenarios presented are an estimate of future performance based on past evidence relating to variations in the value of this investment, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the PMC is unable to pay out?

OFI INVEST ASSET MANAGEMENT is a Portfolio Management Company approved and supervised by the French Financial Markets Authority (AMF). OFI INVEST ASSET MANAGEMENT complies with organisational and operational rules, particularly with regard to equity. In the event of default by OFI INVEST ASSET MANAGEMENT, no legal compensation scheme is envisaged because the UCl's solvency is not called into question. The Depositary ensures the custody and safekeeping of the Fund's assets.

What are the costs?

The total cost includes one-off costs (entry or exit costs) and recurring costs (management costs, portfolio transaction costs, etc.), as well as incidental costs (performance fees and, where applicable, carried interest).

Reduction in Yield (RIY) represents the impact of costs on performance in percentage terms, i.e., the difference between performance excluding costs and performance including costs. The amounts shown here are the cumulative costs of the product itself for different holding periods (except for UCIs with a recommended holding period of less than one year). They include potential early exit penalties. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.

Costs over time (for an investment of EUR 10,000)

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Scenario investment [10 000 EUR]	If you exit after 1 year	If you exit after the recommended holding period	
Total Costs	202.72 €	769.83 €	
Impact on yield (RIY) per year	2.03 %	1.16 %	

Breakdown of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period
- The meaning of the different cost categories

It shows the impact on return each year.

One-off costs (distribution costs, structuring costs, marketing costs, subscription costs (including taxes)	Entry costs	N/A	The impact of the costs you pay when entering your investment (this is the most you will pay, and you could pay less) And/or where the costs are embedded in the price, for instance, in the case of PRIPs other than investment funds. The impact of costs already included in the price. This is the most you will pay, and you could pay less. Where distribution costs are included in entry costs, this includes the costs of distributing your product.
	Exit Costs	N/A	The impact of the costs of exiting your investment when it matures.
Recurring costs (unavoidable operating costs	Portfolio transaction costs	0.42%	The impact of the costs incurred when we buy and sell investments underlying the product.
of the UCI, all payments, including remuneration related to the UCI or providing services to it, transaction costs)	Other recurring costs	0.45%	The impact of the costs that we charge each year for managing your investments and the costs set out in Section II.
Incidental costs (performance fees paid to the manager or investment advisers where applicable, and possibly carried interest if the UCI provides for this)	Performance Fees	0.16%	The impact of the performance fee. We deduct this fee from your investment if the product outperforms its benchmark corresponding to 20% (incl. tax) above the Euro Stoxx Net Dividend Reinvested Index

How long should I hold the UCI and can I take my money out early?

Recommended holding period: 5 years

We are of the view that the recommended holding period is ideal for the UCI to optimise benefit from the income from this type of instrument.

You may redeem your investment at any time; however, the recommended holding period opposite is intended to minimise your risk of capital loss in the event of redemption before this period, even though it does not constitute a guarantee.

How can I make a complaint?

For any complaint relating to the UCI, the subscriber may consult their adviser or contact OFI INVEST ASSET MANAGEMENT.

- Either by post: OFI INVEST ASSET MANAGEMENT 22 rue Vernier 75017 PARIS
- Or directly via the website at the following address: contact.clients.am@ofi-invest.com

If, following your complaint, you are not satisfied with the response provided by the OFI Group, you may also contact the AMF Ombudsman via the following link: www.amf-france.org or write to the following address: Médiateur de l'AMF, Autorité des Marchés Financiers, 17 place de la Bourse, 75082 Cedex 02.
