 Call +33 1 40 68 12 94 for more information, or go to our website: <http://www.ofi-invest-am.com>.

The French Financial Markets Authority (Autorité des marchés financiers - AMF) is responsible for supervising Ofi Invest Asset Management in relation to this Key Information Document.
 Ofi Invest Asset Management is authorised (under no. GP-92-12) and regulated by the AMF.

This PRIIPS is authorised for marketing in Germany and Austria, and regulated by the German Federal Financial Supervisory Authority (BAFIN)
 and the Austrian Financial Markets Authority (FMA).
 Date of production of the KID: 01/09/2023

What is this product?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS) under French law, created in the form of an Investment Company with Variable Capital (SICAV).

Term: There is no maturity date for this product, although it was created with a term of 99 years. It may be liquidated or merged with another fund under the conditions set out in the Sub-Fund's regulations.

Objectives: This key information document only sets out the objectives of the Ofi Invest ESG Euro Credit Short Terme sub-fund of the Global SICAV fund.

As the assets and liabilities of the SICAV's sub-funds are segregated, investors in each sub-fund cannot be affected by sub-funds to which they have not subscribed. Investors may not trade their shares in one sub-fund for shares in another sub-fund.

The Sub-Fund's management objective is to outperform the daily capitalised €STR over the recommended holding period through exposure to interest-rate products, by adopting an SRI approach.

The investment universe is defined as follows:

All financial and non-financial companies that are rated "Investment Grade" that have issued one or more bonds in euros. For this purpose, we use the ICE BofA 1-3 Year Euro Corporate Index (ticker: ER01) as the reference scope. It represents approximately 550 issuers (*).

The Sub-Fund's objective is to capitalise on:

- changes in short-term rates during changes in the monetary cycle; managers will actively manage the Sub-Fund's sensitivity during this period. Therefore, should managers favour a rise in rates, the Sub-Fund's sensitivity will be reduced in order to reduce the impact of the expected rise on the net asset value. Conversely, when the scenario anticipates a drop in key rates, the Sub-Fund's sensitivity will be increased in order to benefit from the rise in the price of fixed-rate securities.

The Sub-Fund's sensitivity will be between 0 and 2

- active management of issuers within the portfolio. Changes in credit spreads (credit margins between securities issued by private entities and securities issued by governments) will hugely affect any changes in the net asset value. Therefore, the choice of issuers in which the Sub-Fund invests plays a key role in delivering the expected performance. The selection of individual issuers draws on the combined expertise of Ofi Invest Asset Management's credit analysts (fundamental analysis) and credit managers (market analysis), as well as a quantitative analysis, in order to select issuers which suit the management constraints and offer the best potential for appreciation. Please note that no investments are made in sovereign issuers.

As part of its management approach, the manager will select securities with maturities of up to three years maximum. These strategies may be implemented simultaneously in the Sub-Fund.

Alongside the financial analysis, as part of their study, the manager also analyses non-financial criteria in order to commit to a "Socially Responsible Investment" (SRI) selection of portfolio companies. The non-financial analysis or rating carried out will cover at least 90% minimum of the portfolio's securities (as a percentage of the mutual fund's net assets, excluding cash).

The Sub-Fund may invest up to 110% maximum of its assets in debt securities, bonds and money-market instruments. These will mainly be negotiable bonds and debt securities, including convertible bonds (up to 10% of the Sub-Fund's assets), listed on a regulated market in an OECD country (with the largest investment area being the eurozone), denominated in euros and issued by private or public companies.

Portfolio securities, or, alternatively, their issuers, must be rated "Investment Grade", under the rating policy put in place by the Management Company. The Sub-Fund may invest up to 10% of its net assets in "non Investment Grade" securities (as per the agency rating or an internal analysis by the Management Company, or which hold no rating).

The Sub-Fund may trade on regulated French and foreign financial futures markets (futures contracts and options) and perform over-the-counter transactions (swaps, caps and floors, options and forwards) as part of its management objective. The Sub-Fund may also invest in money-market instruments (including up to 10% maximum of the assets in eurocommercial paper) as part of its cash-investment approach.

The Sub-Fund's exposure to credit derivatives may not exceed 100% of its net assets.

Benchmark index: The capitalised €STR will be the benchmark used by the investor for comparing the UCITS' performance. The "€STR" (Euro Short-Term Rate) index is calculated using the weighted average of overnight transactions of over €1 million in unsecured loan transactions on the money market by the most active banking institutions in the eurozone.

Subscription and redemption procedures: Investors may subscribe to their shares, either as an amount or as a number of shares, and redeem their shares, as a number of shares, on request, on each valuation day, from IZNES (directly registered shares) and from Société Générale (by delegation by the Management Company for managed bearer or registered shares). Subscription and redemption requests are centralised on each valuation day up to 12:00 pm and are executed based on the next net asset value. The corresponding payments are made on the second non-holiday trading day following the net asset value date applied. For subscriptions or redemptions that go through another institution, additional time for routing these orders is required for instructions to be processed. The net asset value is calculated on each non-holiday trading day and is dated that same day.

Intended retail investors: This GI share class in the Sub-Fund is aimed at German and Austrian subscribers with a minimum initial subscription amount of €500,000, who are seeking higher appreciation on their capital than the appreciation on the daily capitalised €STR, and features diverse investments geared towards the credit markets. Potential investors are advised to have a medium-term investment horizon of 18 months. Capital is not guaranteed for investors, who should be able to bear losses equal to their total investment in the Sub-Fund. The Sub-Fund's shares are not available for subscription by US Persons (see the "Intended subscribers and profile of the typical investor" section in the prospectus). This share accumulates its distributable amounts.

Recommendation: the recommended holding period is 18 months. This Sub-Fund may not be suitable for investors who plan to withdraw their contribution before 18 months have elapsed.

Depository: SOCIETE GENERALE

Further information (prospectus, annual report and the half-yearly report), along with information on other share classes, is available free of charge, in French, at the address below. This information may also be sent by post within one week on written request from the investor sent to:

Ofi Invest Asset Management
 Direction Juridique
 22, rue Vernier - 75017 Paris - France

The Sub-Fund's net asset value is available on the AMF website (www.amf-france.org) and on the Management Company's website (www.ofi-invest-am.com).

What are the risks and what could I get in return?

Summary Risk Indicator:

! The risk indicator assumes you keep the product for the recommended holding period. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class; in other words, the potential losses from future performance of the product are low, and if market conditions were to deteriorate, it is unlikely that our capacity to pay you would be affected. This product does not expose you to any additional financial obligations or liabilities. This product does not include any protection from future market performance, so you could lose some or all of your investment.

Other materially relevant risks not included in the Summary Risk Indicator are:

- Credit risk: the issuer of a debt security held by the Sub-Fund is no longer able to make the coupon payments or repay the capital.
- Liquidity risk: the potential major impact on asset prices when a financial market is unable to absorb transaction volumes.
- Counterparty risk: the investor is exposed to the risk of a counterparty defaulting or being unable to meet its contractual obligations as part of an over-the-counter transaction.

Performance scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over a one-year period and over the recommended holding period. They are calculated based on a past performance record of at least ten years. If the past performance record is not long enough, it will be supplemented with assumptions used by the Management Company. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Example Investment: €10,000		If you exit after 1 year	If you exit after 18 months (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	€9,170	€9,310
	Average return each year	-8.26%	-4.63%
Unfavourable	What you might get back after costs	€9,370	€9,380
	Average return each year	-6.30%	-4.15%
Moderate	What you might get back after costs	€9,730	€9,710
	Average return each year	-2.74%	-1.93%
Favourable	What you might get back after costs	€10,000	€10,010
	Average return each year	-0.01%	0.06%

- The scenarios are based on an investment (compared to historical net asset values) made:
- between 30/04/2021 and 31/10/2022 for the unfavourable scenario;
- between 31/01/2020 and 31/07/2021 for the moderate scenario;
- between 31/03/2020 and 30/09/2021 for the favourable scenario.

What happens if the PMC is unable to pay out?

The Sub-Fund is a collective financial instrument investment and deposit vehicle, which is separate from the Management Company. Should there be a default by the Management Company, the Sub-Fund assets held by the depositary will not be affected. Should there be a default by the depositary, the risk of loss of the Sub-Fund is mitigated as a result of the depositary's assets being segregated by law from the Sub-Fund's assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- €10,000 is invested;
- In the first year you would get back the amount that you invested (0% annual return);
- For the other holding periods the product performs as shown in the moderate scenario.

Costs over time (for an investment of €10,000):

	If you exit after 1 year	If you exit after 18 months
Total costs	€322	€334
Annual cost impact (*)	3.22%	2.24% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example this shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 0.31% before costs and -1.93% after costs.

Composition of Costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year.
Entry costs	2.0% maximum of the amount you pay in when entering this investment. This is the maximum amount that may be deducted from your capital before it is invested. In some cases, you may pay less.	Up to €200
Exit costs	1.0% of your investment before it is paid out to you. This is the maximum amount. In some cases, you may pay less.	98
Ongoing costs taken each year		
Management fees and other administrative and operating costs	0.0%. This is an estimate based on actual costs over the last financial year ended at the end of December 2022. This figure may vary from one financial year to the next.	€0
Transaction costs	0.24% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€24
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	None

How long should I hold the UCI and can I take money out early?

Recommended holding period: 18 months

You can redeem your investment at any time. However, the recommended holding period as shown is intended to minimise your risk of capital loss in the event of redemption before this period, although this does not constitute a guarantee.

How can I complain?

For any complaint relating to the Sub-Fund, subscribers may consult their adviser or contact Ofi Invest Asset Management:

- either by post: Ofi Invest Asset Management - 22, rue Vernier - 75017 Paris - France
- or by e-mail directly at the following address: contact.clients.am@ofi-invest.com or on the website: www.ofi-invest-am.com.

If you are not satisfied with the response given, you may also refer the matter to the AMF Ombudsman via the following link: www.amf-france.org (mediation section) or write to the following address: Médiateur de l'AMF, Autorité des marchés financiers, 17 place de la Bourse, 75082 Cedex 02.
