

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

Ofi Invest Actions Japon – Afer Actions Japon H unit • ISIN: FR001400TXM6

A UCI managed by Ofi Invest Asset Management (Aéma Groupe) – A Public Limited Company with a Board of Directors – 22 rue Vernier – 75017

Please call +33 (0)1 40 68 17 10 for any further information you may require, or go to our website: [www.ofi-invest-am.com](http://www.ofi-invest-am.com).

The French Financial Markets Authority (Autorité des Marchés Financiers - AMF) is responsible for supervising Ofi Invest Asset Management in relation to this Key Information Document.

Ofi Invest Asset Management is authorised (under no. GP-92-12) and regulated by the AMF.

Date of production of the KID: 16/05/2025

## What is this product?

**Type:** Undertaking for Collective Investment in Transferable Securities (UCITS) under French law, created in the form of a Mutual Fund (hereinafter the “Fund”).

**Term:** There is no maturity date for this product, although it was created with a term of 99 years. It may be liquidated or merged with another fund under the conditions set out in the Fund's regulations.

**Objectives:** The objective of the Fund is to capture the financial potential of the Japanese economy, offering performance to investors related to changes on the Japanese equity market over the recommended five-year holding period.

The fundamental approach to portfolio management is based on stock picking, i.e., the ability of managers to select companies based on qualitative and quantitative criteria such as: their intrinsic qualities, their potential for above-average stock market appreciation thanks to an analysis of the companies in which the fund invests and their valuation. No investment decision is made without being supported by strong valuation arguments.

Alongside the financial analysis, as part of their study, the manager also analyses non-financial criteria for optimum selection of securities in the portfolio. The proportion of stocks undergoing an ESG analysis in the portfolio must be higher than 90% of the fund's net assets (excluding cash, UCIs and derivatives).

Management adopts a Best-in-Class ESG approach, which consists of excluding 20%, as a weighting, of the securities with the lowest ESG scores in each sector of the comparison SRI universe, including those securities comprising the TOPIX index.

The ESG analysis of issuers is carried out using a specifically developed proprietary tool that automates the quantitative processing of ESG data, combined with a qualitative analysis performed by the ESG analysis team. Examples of ESG criteria analysed include information security policies and Board independence. The main methodological limitations of the Fund's non-financial strategy are those faced by Ofi Invest Asset Management when developing its ESG rating model (problem associated with non-disclosure of incomplete disclosure by certain companies of information, problem associated with the quantity and quality of ESG data to be processed).

The management strategy is discretionary in terms of stock picking.

Between 60% and 100% of the net assets in the Fund's portfolio will be invested on the Japanese listed equity market, and up to 10% of the Fund's portfolio will be invested in other countries, including emerging countries. The rest of the portfolio will be invested, on the basis of between 0% and 40% of the net assets, in debt securities and money market instruments, issued on the Japanese market and up to 10% of the rest of the portfolio will be invested in securities from other countries, including emerging countries.

The portfolio's exposure may also be achieved or adjusted by means of derivatives.

The Fund's sensitivity range will be between 0 and +8.

Up to 100% of the Fund's net assets will be exposed to currency risk.

Derivatives and embedded derivatives may be used to expose and/or hedge the Fund's exposure above the net assets. The Fund's overall risk is calculated using the commitment method. Calculated using the commitment approach, including exposure via paper securities, units or shares of UCIs and derivative instruments, the Fund's consolidated exposure level may represent up to 300% of the net assets (gross leverage) and up to 200% of the net assets (net leverage).

In order to achieve the management objective, the Fund may use temporary purchases and sales of securities.

**Benchmark index:** The Fund's benchmark is the Topix Net Total Return index (Euro Hedged for the AH, IH, XXL H, XL H and RF H units). The index is constructed from the 2,000 shares listed in the first section of the Tokyo Stock Exchange. It is calculated by weighting each security according to its market capitalisation.

The Fund is actively managed. The composition of the Fund may deviate significantly from the benchmark allocation.

**Subscription and redemption procedures:** Investors may request the subscription or redemption of their units, either as an amount or as a number of units, on every trading day, from the centralising agent Société Générale S.A. (32, rue du Champ de Tir - 44000 Nantes - France). Subscription and redemption orders (processed at an unknown price) are centralised daily every day before 12:00 pm (D-1) and are executed on the basis of the net asset value (dated D) calculated on D+1, based on the closing prices on D. For subscriptions or redemptions that go through another institution, additional time for routing these orders is required for instructions to be processed.

The net asset value is calculated on each trading day, with the exception of public holidays in France or Japan (the NAV is therefore not calculated on closing days of one of the following stock exchanges: Paris, Tokyo).

This unit accumulates and/or distributes its distributable amounts.

**Intended retail investor:** This unit is open to all subscribers, and is more specifically intended to be used as a vehicle for life insurance policies taken out by AFER with the Groupe Abeille Assurances. It is aimed at investors who are sufficiently experienced to assess the merits and risks of a speculative management strategy on international interest rate markets, and of exposure to the risks detailed in the prospectus. Potential investors are advised to have an investment horizon of at least five years. Capital is not guaranteed for investors, who should be able to bear losses equal to the amount of their investment in the Fund. Units of the Fund may not be subscribed by US Persons (see “Subscribers concerned and typical investor profile” section of the prospectus).

**Recommendation:** the recommended holding period is five years. This Fund may not be suitable for investors who plan to withdraw their contribution before five years have elapsed.

**Depository:** Société Générale S.A

Further information (prospectus, annual report, half-yearly report), along with information on other share classes, is available free of charge, in French, at the address below. This information may also be sent by post within one week on written request from the investor sent to:

Ofi Invest Asset Management  
 Direction Juridique  
 22 Rue Vernier - 75017 Paris - France

The Fund's net asset value is available on the AMF website ([www.amf-france.org](http://www.amf-france.org)) and on the Management Company's website ([www.ofi-invest-am.com](http://www.ofi-invest-am.com)).

## What are the risks and what could I get in return?

### Summary Risk Indicator:

**!** The risk indicator assumes you keep the product for the recommended holding period of five years. The actual risk can vary if you exit before the recommended holding period and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is an **average** risk class; in other words, the potential losses from future performance of the product are at a level between average and high, and if market conditions were to deteriorate, it is possible that our capacity to pay you would be affected.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

Other materially relevant risks not included in the Summary Risk Indicator are:

- Credit risk: the issuer of a debt security held by the Fund is no longer able to make the coupon payments or repay the capital.
- Liquidity risk: the potential major impact on asset prices when a financial market is unable to absorb transaction volumes.
- Counterparty risk: the investor is exposed to the risk of a counterparty defaulting or being unable to meet its contractual obligations as part of an over-the-counter transaction.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over a one-year period and over the recommended holding period. They are calculated based on a past performance record of at least ten years. If the past performance record is not long enough, it will be supplemented with assumptions used by the Management Company. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

| Example Investment: €10,000 |  | If you exit after 1 year | If you exit after 5 years<br>(recommended holding period) |
|-----------------------------|--|--------------------------|---|
| Minimum                     | There is no minimum guaranteed return. You could lose some or all of your investment |                          |   |
| Stress                      | <b>What you might get back after costs</b>   | €3,330                   | €2,900  |
|                             | Average return each year   | -66.74%                  | -21.93%   |
| Unfavourable                | <b>What you might get back after costs</b>   | €7,500                   | €9,520  |
|                             | Average return each year   | -25.0%                   | -0.97%  |
| Moderate                    | <b>What you might get back after costs</b>   | €10,690                  | €13,080   |
|                             | Average return each year   | 6.92%                    | 5.52%   |
| Favourable                  | <b>What you might get back after costs</b>   | €14,050                  | €20,170   |
|                             | Average return each year   | 40.46%                   | 15.07%  |

The scenarios are based on an investment (compared to a history of established net asset values cumulated with a market index deemed relevant, detailed on the Management Company's website) carried out:

- between 1st September 2019 and 1st September 2022 for the unfavourable scenario;
- between 1st May 2015 and 1st May 2018 for the moderate scenario; and
- between 1st December 2018 and 1st December 2021 for the favourable scenario.

### What happens if the PMC is unable to pay out?

The Fund is a collective financial instrument investment and deposit vehicle, which is separate from the Management Company. Should there be a default by the Management Company, the Fund assets held by the depositary will not be affected. Should there be a default by the depositary, the risk of loss of the Fund is mitigated as a result of the depositary's assets being segregated by law from the assets of the Fund.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- €10,000 is invested;
- in the first year you would get back the amount that you invested (0% annual return);
- for the other holding periods we have assumed the product performs as shown in the moderate scenario.

## Costs over time (for an investment of €10,000)

|                        | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs            | €518                     | €1,225                    |
| Annual cost impact (*) | 5.23%                    | 2.17% each year           |

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 7.69% before costs and 5.52% after costs.

## Composition of Costs

| One-off costs upon entry or exit                             | Annual cost impact if you exit after 1 year.  |            |
|--|---|------------|
| Entry costs  | 4% of the amount you pay in when entering this investment. This is the maximum amount that may be deducted from your capital before it is invested. In some cases, you may pay less.  | Up to €400 |
| Exit costs   | There are no exit costs for this product.   | None       |
| Ongoing costs taken each year                                |   |            |
| Management fees and other administrative and operating costs | 1.15%. This is an estimate based on actual costs over the last financial year ended at the end of August 2024. This figure may vary from one financial year to the next.  | €110       |
| Transaction costs  | 0.08% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | €8         |
| Incidental costs taken under specific conditions             |   |            |
| Performance fees   | There is no performance fee for this product.   | None       |

## How long should I hold my investment in the Fund for and can I withdraw money early?

**Recommended holding period:** 5 years

You can redeem your investment at any time. However, the recommended holding period as shown is intended to minimise your risk of capital loss in the event of redemption before this period, although this does not constitute a guarantee.

## How can I complain?

For any complaint relating to the Fund, subscribers may consult their advisor or contact Ofi Invest Asset Management:

- either by post: Ofi Invest Asset Management - 22 Rue Vernier - 75017 Paris - France
- or by e-mail directly at the following address: [service.client@ofi-invest.com](mailto:service.client@ofi-invest.com) or on the website: [www.ofi-invest-am.com](http://www.ofi-invest-am.com)

If you are not satisfied with the response given, you may also refer the matter to the AMF Ombudsman via the following link: [www.amf-france.org](http://www.amf-france.org) (mediation section) or write to the following address: Médiateur de l'AMF, Autorité des Marchés Financiers, 17 Place de la Bourse, 75082 Cedex 02.

## Other relevant information

When this product is used as a unit-linked fund for a life insurance or endowment policy, additional information about this policy – such as the policy costs (which are not included in the costs set out in this document), the contact person for making a claim and what happens should the insurance company default – is set out in the key information document for this policy, which must be provided by your insurer or broker or any other insurance intermediary under its statutory obligation.

SFDR categorisation: Article 8

The Fund promotes environmental and/or social characteristics and governance within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR). For more information about sustainable finance, please visit the website: <https://www.ofi-invest-am.com/en/sustainable-finance>.

Information about the past performance of the Fund presented over five years, along with calculations of past performance scenarios, is available at: <https://www.ofi-invest-am.com/en/produits>

The Remuneration Policy and any updates are available at [www.ofi-invest-am.com](http://www.ofi-invest-am.com) and can also be provided in hard copy format free of charge or on written request sent to the address above.

Ofi Invest Asset Management can only be held liable for statements contained in this document that are misleading, inaccurate or inconsistent with the corresponding sections of the Fund prospectus.
