What is this product?

Type: The Shares are a class of shares in **OFI INVEST EUROPEAN EQUITY STRATEGIC AUTONOMY** (the "Sub-Fund"), a sub-fund of **GLOBAL PLATFORM** (the "Fund"). The Fund is organised as a public limited company (société anonyme) in the form of an investment company with variable capital (société d'investissement à capital variable) and qualifies as an undertaking for collective investment in transferable securities (« UCITS ») within the meaning of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment (the "2010 Law"). The Fund has appointed **Ofi Invest Lux** as its management company in accordance with the 2010 Law (the "Management Company").
The Sub-Fund is a compartment of an investment fund, whose performance will depend on the performance of its portfolio. The assets and liabilities of the Sub-Fund are segregated from the other sub-funds of the Fund by law. The performance of other sub-funds of the Fund therefore have no impact on the performance of the Sub-Fund or the return on your investment.

Term: The Fund and the Sub-Fund were set up with an unlimited duration. The board of directors of the Fund (the "Board") has the power to terminate the Sub-Fund, or the Shares, in certain circumstances as further described in the prospectus of the Fund (the "Prospectus") and the articles of incorporation of the Fund (the "Articles"). The PRIIP Manufacturer cannot terminate the Fund, the Sub-Fund or the Shares unilaterally. The Fund may be dissolved at any time by a decision of the general meeting of shareholders subject to the quorum and majority requirements outlined in the Articles.

Objectives: The Sub-Fund aims to outperform, over a recommended investment horizon of at least 5 years, its reference benchmark which is the Eurostoxx (ticker: SXXT Index) (the "Benchmark").
The Sub-Fund is actively managed and invests mainly in equity securities, including common stocks and real estate investment trusts ("REITs") of European companies (located in the European Economic Area, United Kingdom and Switzerland) that strengthen Europe's ability to defend its interests and promote its economic, technological/digital, energy, and strategic autonomy.
To ensure eligibility for the French equity saving plan (Plan d'Épargne en Actions or PEA), at least 75% of the Sub-Fund's net assets shall be permanently invested in common stock of companies having their registered office in the European Economic Area. Financial derivative instruments may be used for hedging and investment purposes only.
The Sub-Fund integrates Environmental, Social, and Governance ("ESG") criteria into its investment process with a view toward generating sustainable, long-term returns, which may have a financial impact on that investment and affect the performance of a portfolio. ESG factors may include exposure to environmental risks such as natural disasters, management of energy resources and human capital. The environmental factor will thus be paramount in the calculation of the final rating of issuers. The Sub-Fund follows an ESG "score improvement" approach, aiming for an average ESG score higher than the average ESG score of the comparison socially responsible investment ("SRI") universe. There is a risk that, from time to time, the final rating assigned to an issuer by the Management Company will differ from that proposed by a third party. The selection of SRI funds not managed by the Management Company may generate a lack of consistency insofar as the funds selected may a priori set up ESG approaches that are different and independent of each other.

Benchmark index: The Sub-Fund is not managed in reference to the Benchmark. The investment manager of the Sub-Fund has discretion over the composition of the portfolio within the limits of its investment policy, and it is not expected that the Sub-Fund will hold constituents of the Benchmark in the same proportion as their weighting in the Benchmark. The investment manager may also invest in countries not included in the Benchmark to take advantage of specific investment opportunities. This deviation may be significant and is likely to be a key element explaining the extent to which the Sub-Fund can outperform the Benchmark. The Sub-Fund will use the Benchmark as an indicator to measure past performance of the Sub-Fund and in the calculation of outperformance fees.

Redemption procedures: You can request the redemption of your Shares from the registrar and transfer agent or the principal distributor on a daily basis (on any dealing day, i.e., on which banks in Luxembourg and Paris are open for banking business).
A swing pricing mechanism has been implemented by the Management Company as part of its valuation process, and redemption gates may also be applied. For further information on these mechanisms, please refer to the prospectus.

Further information: Further information is available at www.ofi-invest-am.com and www.ofi-invest-lux.com, where you can obtain a copy of the Prospectus (available in English), semi-annual and annual reports (available in English), free of charge. Our website also provides other information not contained in the above documents such as the most recent prices of the Shares. Periodic reports and the Prospectus are prepared for the Fund as a whole.

Conversions: With the approval of the Fund, you may be able to convert the Shares into shares of another sub-fund of the Fund. Further information can be found in the Prospectus.

SFDR: The Sub-Fund promotes environmental and/or social characteristics and governance within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR").

Depositary: JP Morgan SE, Luxembourg Branch (the "Depositary").

Dividends: This Share Class capitalizes and/or distributes its distributable amounts.
Intended retail investor: The I-XL Class Shares of this Sub-Fund is open to institutional investors with a minimum initial subscription amount of €30,000,000. Investors should (a) have sufficient past experience and theoretical knowledge of this kind of investment allowing them to assess the risk of investing in this kind of product, (b) have a medium/long-term investment horizon of 5 years, and (c) have sufficient resources to be able to bear the loss of their entire capital when investing in the Shares. The need of the retail investor to be able to bear the loss of their entire investment is due to several risks including market and credit risk, which can significantly impact your return on investment. These risks are further described in the section "What are the risks and what could I get in return?" below. Investors should be willing to assume a risk of 4 out of 7, which is the medium risk. The Shares are not available for subscription by US Persons (see the "Intended subscribers and profile of the typical investor" section in the prospectus).

What are the risks and what could I get in return?

Risk Indicator:

1	2	3	**4**	5	6	7

Lower risk — Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 4 out of 7, which is a medium risk class. In other words, the potential losses due to future market movements are at a medium level, and if market conditions were to deteriorate, it is possible that our capacity to pay you would be affected.
Beside the risks included in the Risk Indicator, other risks may affect the Sub-Fund's performance. Please refer to the prospectus.
This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios:

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last ten years. Markets could develop very differently in the future.

Recommended holding period: 5 years **Example Investment: 10,000 €**		**If you exit after 1 year**	**If you exit after 5 years**
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	**What you might get back after costs**	3,590 €	3,390 €
	Average return each year	-64.07 %	-19.44 %
Unfavourable	**What you might get back after costs**	8,090 €	10,050 €
	Average return each year	-19.13 %	0.10 %
Moderate	**What you might get back after costs**	10,950 €	14,650 €
	Average return each year	9.48 %	7.93 %
Favorable	**What you might get back after costs**	14,330 €	19,340 €
	Average return each year	43.26 %	14.10 %

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.
This type of scenario occurred for an investment in the Benchmark (i) between September 2017 and September 2022 for the unfavourable scenario; (ii) between December 2016 and December 2021 for the intermediate scenario; and (iii) between October 2020 and October 2025 for the favourable scenario.

What happens if Ofi Invest Lux is unable to pay out?

The Fund is an investment company, which is separate from the PRIIP Manufacturer. Should there be a default by the PRIIP Manufacturer, the assets of the Fund, and thereby the Sub-Fund, held by the Depositary, will not be affected. With respect to the Depositary, there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited due to the rules set out in the law, which require a segregation of assets between those of the Depositary and the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depositary is liable in case of its negligent or intentional failure to properly fulfill its obligations pursuant to the 2010 Law. Losses are not covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- in the first year you would get back the amount that you invested (0% annual return);
- for the other holding periods, we have assumed the product performs as shown in the moderate scenario;
- 10,000 € is invested.

Investment: 10,000 €	**If you exit after 1 year**	**If you exit after 5 years**
Total costs	178 €	688 €
Annual cost impact*	1.79 %	1.07 % per year

Composition of Costs

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is projected to be 9.00 % before costs and 7.93 % after costs.

One off costs upon entry or exit		If you exit after 1 year
Entry costs	1.00 % maximum of the amount you pay when you start investing. This is the maximum amount that may be deducted from your capital before it is invested. In some cases, you may pay less.	Up to 100 €
Exit costs	There are no exit costs for this product.	None
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	0.60 % of the value of your investment per year. It's an estimation of all fees and expenses that may be charged for one financial year. This figure may vary from one financial year to the next.	59 €
Transaction costs	0.19 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	19 €
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	None

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

We have selected the recommended holding period of 5 years to align your shareholding with the medium to long-term nature of the underlying portfolio investments and the assumption that these investments will generate a return over a medium to long-term period. While the recommended holding period is intended to minimise your risk of capital loss, this does not constitute a guarantee.
