

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
Ofi Invest ESG Monétaire

Legal entity identifier:  
969500H4CVZW0RNDJ51

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: \_\_\_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ ☐ No

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It made a minimum of **sustainable investments with a social objective**: \_\_\_\_%

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Ofi Invest ESG Monétaire (hereinafter the "**Fund**") promoted environmental and social characteristics through the implementation of two systematic approaches:

1. Regulatory and sector-based exclusions;
2. ESG integration through different requirements.

In fact, this SRI-labelled Fund followed a best-in-class approach, enabling 20% of public and private issuers in each sector to be excluded from the least virtuous investment universe in terms of ESG practice, and only companies integrating ESG practices to be kept in the portfolio. It also complied with the SRI label requirements for monitoring performance indicators.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

As at 31 December 2024, the performance of the sustainability indicators used to measure attainment of the Fund's environmental and social characteristics was as follows:

#### Private issuers:

- **The SRI score:** the portfolio's SRI score was **3.45** out of 5;
- **The percentage of excluded companies with the worst ESG performance in the "Under Supervision" category:** 20%.

In addition, as part of the SRI Label awarded to the Fund, the following two ESG indicators promoting social and environmental characteristics were piloted at the level of the Fund and its SRI universe. Their respective performances as at 31 December 2024 are as follows:

- **Financed emissions on Scopes 1 and 2:** financed emissions on Scopes 1 and 2 represent **15.07** tonnes of CO2 equivalent per million euros in turnover compared to its SRI universe, of which financed emissions represent **80.97** tonnes of CO2 equivalent per million euros in turnover.
- **The proportion of female company board members:** the proportion of female board members is **42.21%**, compared to its universe, where it is **41%**.

#### Public issuers:

There were no public issuers in the portfolio as at 31 December 2024.

Monitoring of the indicators, mentioned previously, in management tools allows confirmation that there were no significant variations in the performance of the indicators throughout the reporting period in question, between 1<sup>st</sup> January 2024 and 31 December 2024.

For more information on these sustainability indicators and their calculation method, please refer to the Fund's prospectus and pre-contractual annex.

### • *...and compared to previous periods?*

As at 29 December 2023, the performances of the sustainability indicators used to measure attainment of the Fund's environmental and social characteristics were as follows:

#### Private issuers:

- **SRI score:** the portfolio's SRI score reached **3.22** out of 5;
- **The percentage of excluded companies with the worst ESG performance in the "Under Supervision" category:** 20%.

In addition, as part of the SRI Label awarded to the Fund, the following two ESG indicators promoting social and environmental characteristics were piloted at the level of the Fund and its SRI universe. Their respective performances as at 29 December 2023 were as follows:

- **Financed Scope 1 and 2 emissions:** Financed Scope 1 and 2 emissions account for **37.39** tonnes of CO2 equivalent per million euros in turnover compared to its SRI universe, whose financed emissions amounted to **86.80** tonnes of CO2 equivalent per million euros in turnover.
- **The proportion of female board members in the company:** the proportion of female board members was **74%**, compared to its universe, where it was **37%**.

#### Public issuers:

There were no public issuers in the portfolio as at 29 December 2023.

Monitoring of the indicators, mentioned previously, in management tools allows confirmation that there were no significant variations in the performance of the indicators throughout the reporting period in question, between 1<sup>st</sup> January 2023 and 29 December 2023.

For more information on these sustainability indicators and their calculation method, please refer to the Fund's prospectus and pre-contractual annex.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The methods of assessment by the Management Company of investee companies, for each of the principal adverse impacts linked to sustainability factors, are as follows:

Adverse impact indicator	Metric	Impact [year n]	Impact [year n-1]	Explanation	Actions taken, and actions planned and targets set for the next reference period
Climate and other environment-related indicators					
Greenhouse gas emissions	Scope 1 GHG emissions	54,342.29 Teq CO <sub>2</sub>	2,945.37 Teq CO <sub>2</sub>	For more information, please refer to the "Statement on the Principal Adverse Impacts of Investment Decisions on Sustainability Factors", which can be found on the Management Company's website	ESG rating <sup>1</sup> these indicators are taken into account in the analysis of the issues: "GHG emissions from the production process" and - "GHG emissions related to upstream and downstream production"; Analysis of controversies on these issues; Engagement Policy on the climate aspect; Say on Climate Voting Policy; Coal/oil and gas sector-based exclusion policies Indicator of emissions
		Coverage rate = 70.9%	Coverage rate = 65.11%		
	Scope 2 GHG emissions	8,413.92 Teq CO <sub>2</sub> e	469.13 Teq CO <sub>2</sub> e		
		Coverage rate = 70.9%	Coverage rate = 65.11%		
	Scope 3 GHG emissions	487419.73 t CO <sub>2</sub> e	12,372.25 Teq CO <sub>2</sub> e		

<sup>1</sup> The ESG rating relies on a sector-based approach. The issues under review and their number differ from one sector to another. For more details on this approach, see section entitled "Identification and prioritisation of principal adverse impacts on sustainability factors".

			Coverage rate = 70.9%	Coverage rate = 65.11%		<p>financed (scope 1 and 2) monitored for funds eligible for the SRI label;</p> <p><u>Additional measures defined in 2024:</u> Delivery of tools to management to coordinate the climate trajectory for each portfolio.</p> <p>Implementation of a credibility score for transition plans in order to correct the trajectory announced.</p> <p>Convergence of funds' ESG monitoring indicators with principal adverse impacts (PAIs).</p> <p>Strengthening of thresholds concerning exclusions based on coal and oil and gas policies</p>
		<b>Total GHG emissions</b>	550175.94 t CO2e	15,785.77 Teq CO2e		
			Coverage rate = 70.9%	Coverage rate = 65.11%		
	<b>2. Carbon footprint</b>	<b>Carbon footprint</b> (Scope 1, 2 and 3 GHG emissions / EVIC)	198.86 (Teq CO2/million EUR)	274.01 Teq CO2/million EUR)	Please refer to the "Statement on Principal Adverse Impacts of	<p>Engagement Policy on the climate aspect.</p> <p>Say-on-Climate Voting Policy.</p>
			Coverage rate = 70.9%	Coverage rate = 65.11%

## What were the top investments of this financial product?

As at 31 December 2024, the top investments are as follows:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

Asset Weight	Country	Sector
EUR CASH (Alpha Committed)	7.9%	European Union
FEDERAL SUPPORT MONETAIRE ESG SI	4.1%	France
CPR MONETAIRE ISR SI	4.1%	France
CREDIT AGRICOLE SA	2.2%	France
BANQUE FEDERATIVE DU CREDIT MUTUEL	2.0%	France
CREDIT AGRICOLE CIB	2.0%	France
LA BANQUE POSTALE	2.0%	France
BPCE SA	1.7%	France
BPCE SA	1.7%	France
CREDIT AGRICOLE SA	1.7%	France
ELECTRICITE DE FRANCE SA	1.7%	France
ING BANK NV	1.3%	Netherlands
ING BANK NV	1.1%	Netherlands
BANQUE FEDERATIVE DU CREDIT MUTUEL	1.1%	France
BNP PARIBAS SA MTN RegS	1.1%	France
		Finance

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

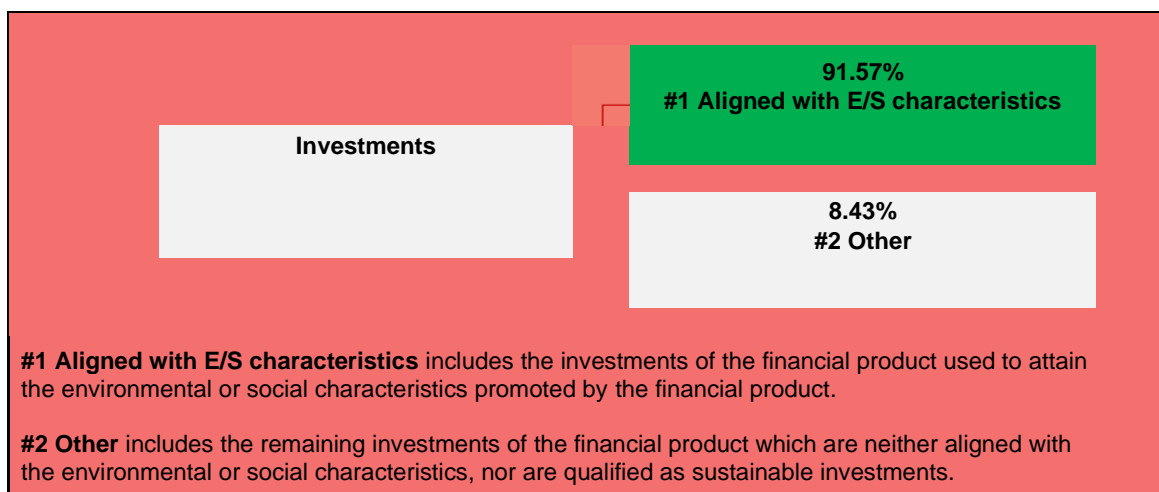

#### Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As at 31 December 2024, at least **91.57%** of the Fund's net assets are made up of investments contributing to the promotion of environmental and social characteristics (**#1 Aligned with E/S characteristics**).

The Fund has **8.43%** of its net assets in category **#2 Other**. This category is made up of:

- 10.83% in cash;
- -0.01% in derivatives;
- 2.40% in securities or portfolio securities without an ESG score;

The Fund therefore complied with the expected asset allocation:

- A minimum of 80% of the Fund's net assets belonging to the category **#1 Aligned with E/S characteristics**;
- A maximum of 20% of the investments belonging to component **#2 Other**, including a maximum of 10% in securities or stocks that do not have an ESG score and a maximum of 10% in liquid assets and derivatives.

● **In which economic sectors were the investments made?**

As at 31 December 2024, the sector-based breakdown of assets invested is as follows:

Ofi Invest ESG Monetaire	
Other	86.8%
Finance	9.6%
Consumer discretionary	1.4%
Healthcare	1.1%
Industry	0.7%
Information technology	0.2%
Utilities	0.2%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As at 31 December 2024, the share of sustainable investments with an environmental objective aligned with the EU Taxonomy in the portfolio is nil.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ **Yes**

- ☐ In fossil gas
- ☐ In nuclear energy

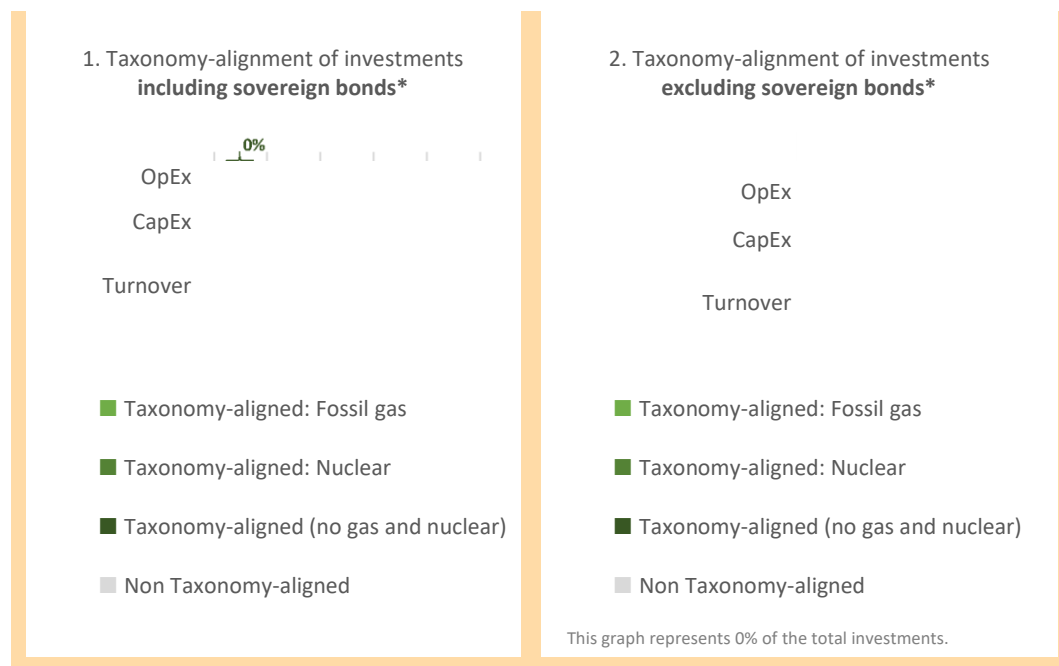

☒ **No**

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

<sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### • What was the share of investments made in transitional and enabling activities?

As at 31 December 2024, the share of investments in transitional and enabling activities in the portfolio is nil.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As at 31 December 2024, the share of investments that were aligned with the EU taxonomy remained nil.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the minimum share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

These investments, which were only made in specific situations, consisted of:

- cash;
- derivatives;
- securities that do not have an ESG score.

Although this category does not have an ESG rating and no minimum environmental and social guarantees were implemented, its use did not have the effect of significantly or permanently distorting the environmental and/or social characteristics promoted by the Fund.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and/or social characteristics during the reference period, all ESG data were made available to managers in the management tools, and the various ESG requirements were configured and tracked in these same tools.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
