 Ofi Invest Asset Management is authorised (under no. GP-92-12) and regulated by the AMF.

This PRIIP is authorised for marketing in Italy and Spain, and regulated by the Italian Companies and Exchange Commission (CONSOB) and the Spanish National Securities Market Commission (CNMV).
 Date of production of the KID: 21/07/2025

What is this product?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS) under French law, created in the form of a Sub-Fund (hereinafter the "Sub-Fund").

Term: There is no maturity date for this product, although it was created with a term of 99 years. It may be liquidated or merged with another fund under the conditions set out in the Sub-Fund's regulations.

Objectives: This key information document only sets out the objectives of the Ofi Invest ESG Credit Bond 1-3 of the Global SICAV fund.

As the assets and liabilities of the SICAV's sub-funds are segregated, investors in each sub-fund cannot be affected by sub-funds to which they have not subscribed. Investors may not trade their shares in one sub-fund for shares in another sub-fund.

The management objective of the Sub-Fund is to achieve a performance greater than that of the ICE BofA 1-3 Year Euro Corporate Index over the recommended investment period, by investing in bonds denominated in euros, adopting an SRI approach.

The portfolio offers active management based on a rigorous investment process to identify and leverage different sources of added value. The macroeconomic analysis serves as the basis for development of an interest-rate scenario. Taking into account the valuation of interest-rate instruments allows interest rate risk and positions on the curve to be adjusted and implemented in the portfolio.

Different strategies can be implemented: directional credit strategies that seek to exploit variations in credit spreads. To do this, the management team relies on the analysis of issuers' credit fundamentals and on valuation criteria; directional interest-rate strategies that depend on the management team's forecasts of changes in the general level of interest rates; credit arbitrage strategies to exploit the inefficiencies of the credit market as a whole; diversifying strategies aimed at exploiting the inefficiencies of interest-rate markets not linked solely to credit risk (e.g. intervention on the rise in interest rates (flattening) or on a country risk unrelated to a particular issuer).

Managers identify a global perspective with consistent market views, and clearly defined investment themes and performance drivers.

Each performance driver is then broken down into basic investment strategies based on analysis of various qualitative and quantitative criteria: - management of exposure to interest rate risk in terms of sensitivity; - management of overall credit risk exposure; - management of sector allocation; - selection of issuers; - selection of securities.

Simultaneous with the financial analysis, the manager complements their study with an analysis of non-financial criteria in order to make the best selection of securities for the portfolio. The proportion of stocks undergoing an ESG analysis in the portfolio must be higher than 90% of the Sub-Fund's net assets (excluding cash, UCIs and derivatives).

As a result, management adopts an ESG "rating improvement" approach, which consists of obtaining an average ESG rating for the portfolio which is higher than the average ESG score for the comparison SRI universe, including those securities comprising the ICE BofA 1-3 Year Euro Corporate Index (ER01), after eliminating 30% of the index weighting. These eliminated securities correspond to the exclusion of private issuers featuring on the management company's sector-based and norm-based exclusion lists for the purposes of the SRI Label, as well as securities with the lowest ESG scores. The Management Company considers this index suitable for the purposes of comparison of the Sub-Fund's ESG score based on its strategy.

Under the SRI Label, the portfolio is committed to outperforming two non-financial indicators (an environmental indicator (PAI indicator 2) and a social indicator (optional PAI indicator 17)), compared to its SRI universe.

Between 70% and 100% of the portfolio's net assets are invested in euro-denominated debt securities and money market instruments of issuers who are members of the OECD.

The types of debt securities and money market securities used will be as follows: - fixed-rate bonds; - variable-rate bonds; - inflation-linked bonds; - sovereign bonds; - high-yield bonds; - negotiable debt securities; - unstructured EMTNs; - equity securities; - government bonds; - puttable bonds; - callable bonds.

The securities picked will be covered by all ratings. The portfolio may invest up to 10% of its net assets in speculative debt securities (High Yield) (rating below BBB- according to the rating policy implemented by the Management Company).

The range of sensitivity to interest rates will be between 0 and +3.

The maximum maturity of bonds is callable in 5 years with a maximum weight of [3Y; 5Y] of net assets. Between 0% and 10% of the portfolio's net assets may be invested in equities and securities giving direct or indirect access to capital or voting rights.

Up to 10% of the portfolio's net assets may be invested in units and shares of UCIs.

The portfolio's exposure is also achieved or adjusted by means of derivatives or instruments with embedded derivatives. The Sub-Fund may act on regulated French and foreign financial futures markets (futures contracts and options) and carry out over-the-counter transactions (swaps, caps and floors and options) as part of its management objective in terms of hedging and exposure. The Sub-Fund may also use CDS (Credit Default Swaps) and TRS (Total Return Swaps). Lastly, the Sub-Fund may use securities with embedded derivatives and carry out temporary purchases and sales of securities.

Benchmark index: The reference benchmark against which investors can compare performance of the UCITS is the ICE BofA 1-3 Year Euro Corporate Index. The ICE BofA 1-3 Year Euro Corporate Index is a subset of the ICE BofA Euro Corporate Index, and includes all securities with a residual maturity of less than three years. It is specified that dividends and redemptions occurring during the month are retained in the index. The currency of this index is the euro.

Subscription and redemption procedures: Investors may subscribe to their shares, either as an amount or as a number of shares, and redeem their shares, as a number of shares, on request, on each valuation day, from IZNES (directly registered shares) and from Société Générale (by delegation by the Management Company for managed bearer or registered shares). Subscription and redemption requests are centralised on each valuation day up to 12:00 pm and are executed based on the next net asset value. The corresponding payments are made on the second non-holiday trading day following the net asset value date applied. For subscriptions or redemptions that go through another institution, additional time for routing these orders is required for instructions to be processed. The net asset value is calculated on each non-holiday trading day and is dated that same day. A redemption capping mechanism may also be implemented by the Management Company. For more information about these mechanisms, please refer to the prospectus.

Intended retail investor: This I share class in the Sub-Fund is aimed at all subscribers with a minimum initial subscription amount of €500,000, who are seeking higher appreciation on their capital than the appreciation on the ICE BofA 1-3 Year Euro Corporate Index, and features diverse investments geared towards the credit markets. Potential investors are advised to have a medium-term investment horizon of three years. Capital is not guaranteed for investors, who should be able to bear losses equal to their total investment in the Sub-Fund. The Sub-Fund's shares are not available for subscription by US Persons (see the "Intended subscribers and profile of the typical investor" section in the prospectus). This share accumulates its distributable amounts.

Recommendation: the recommended holding period is three years. This Sub-Fund may not be suitable for investors who plan to withdraw their contribution before three years have elapsed.

Depository: SOCIETE GENERALE

Further information (prospectus, annual report and the half-yearly report), along with information on other share classes, is available free of charge, in French, at the address below. This information may also be sent by post within one week on written request from the investor sent to:

Ofi Invest Asset Management
 Direction Juridique
 127-129 Quai du Président Roosevelt - 92130 Issy-les-Moulineaux - France

The Sub-Fund's net asset value is available on the AMF website (www.amf-france.org) and on the Management Company's website (www.ofi-invest-am.com).

What are the risks and what could I get in return?

Summary Risk Indicator:

! The risk indicator assumes you keep the product for the recommended holding period. The actual risk can vary if you cash in before the recommended holding period and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class; in other words, the potential losses from future performance of the product are low, and if market conditions were to deteriorate, it is unlikely that our capacity to pay you would be affected. This product does not expose you to any additional financial obligations or liabilities. This product does not include any protection from future market performance, so you could lose some or all of your investment.

Other materially relevant risks not included in the Summary Risk Indicator are:

- Credit risk: the issuer of a debt security held by the Sub-Fund is no longer able to make the coupon payments or repay the capital.
- Liquidity risk: the potential major impact on asset prices when a financial market is unable to absorb transaction volumes.
- Counterparty risk: the investor is exposed to the risk of a counterparty defaulting or being unable to meet its contractual obligations as part of an over-the-counter transaction.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over one year and the recommended investment period. They are based on a minimum history of ten years. If the history is insufficient, it is supplemented on the basis of assumptions made by the management company. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Example Investment: €10,000		If you exit after 1 year	If you exit after 3 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	€8,940	€9,020
	Average return each year	-10.58%	-3.38%
Unfavourable	What you might get back after costs	€9,080	€9,150
	Average return each year	-9.2%	-2.93%
Moderate	What you might get back after costs	€9,750	€9,820
	Average return each year	-2.50%	-0.62%
Favourable	What you might get back after costs	€10,320	€9,910
	Average return each year	3.17%	-0.29%

The scenarios are based on an investment (compared to historical net asset values) made:

- between 01/09/2019 and 01/09/2022 for the unfavourable scenario;
- between 01/12/2016 and 01/12/2019 for the moderate scenario;
- between 01/09/2015 and 01/09/2018 for the favourable scenario.

What happens if the PMC is unable to pay out?

The Sub-Fund is a collective financial instrument investment and deposit vehicle, which is separate from the Management Company. Should there be a default by the Management Company, the Sub-Fund assets held by the depositary will not be affected. Should there be a default by the depositary, the risk of loss of the Sub-Fund is mitigated as a result of the depositary's assets being segregated by law from the Sub-Fund's assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- €10,000 is invested;
- In the first year you would get back the amount that you invested (0% annual return);
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Costs over time (for an investment of €10,000):

	If you exit after 1 year	If you exit after 3 years
Total costs	€363	€497
Annual cost impact (*)	3.64%	1.67% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.05% before costs and -0.62% after costs.

Composition of Costs

One-off costs upon entry or exit	Annual cost impact if you exit after 1 year	
Entry costs	2.0% maximum of the amount you pay in when entering this investment. This is the maximum amount that may be deducted from your capital before it is invested. In some cases, you may pay less.	Up to €200
Exit costs	1.0% of your investment before it is paid out to you. This is the maximum amount. In some cases, you may pay less.	98
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.20%. This is an estimate based on actual costs over the last financial year ended December 2024. This figure may vary from one financial year to the next.	€20
Transaction costs	0.26% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€26
Incidental costs taken under specific conditions		
Performance fees	0.20%. We deduct this fee from your investment if the product outperforms its benchmark index (i.e., 20% incl. tax of performance above the ICE BofA 1-3 Year Euro Corporate Index). The actual amount will vary depending on how well your investment performs. The cost estimation below includes the average over the last 5 years. (The period for which this outperformance fee is deducted runs from 1 April to 31 March each year) Exceptionally, the formula for calculating the outperformance fee will be linked as follows: from 1 April 2025 to 18 July 2025, it will be equal to 20% incl. tax, compared to the best performance between the €STR index capitalised daily +25 bps and zero (0)%, then from 21 July 2025 to 31 March 2026, it will be equal to 20% incl. tax above the performance of the ICE BofA 1-3 Year Euro Corporate Index.	€19

How long should I hold the UCI and can I take money out early?

Recommended holding period: 3 years

You can redeem your investment at any time. However, the recommended holding period as shown is intended to minimise your risk of capital loss in the event of redemption before this period, although this does not constitute a guarantee.

A redemption capping mechanism may also be implemented by the Management Company. For more information about these mechanisms, please refer to the prospectus.

How can I complain?

For any complaints relating to the Sub-Fund, subscribers may consult their adviser or contact Ofi Invest Asset Management:

- either by post: Ofi Invest Asset Management - 127-129 Quai du Président Roosevelt – 92130 Issy-les-Moulineaux – France
- or by e-mail directly at the following address: contact.clients.am@ofi-invest.com or on the website: www.ofi-invest-am.com

If you are not satisfied with the response given, you may also refer the matter to the AMF Ombudsman via the following link: www.amf-france.org (mediation section) or write to the following address: Médiateur de l'AMF, Autorité des Marchés Financiers, 17 place de la Bourse, 75082 Paris Cedex 02.

Other relevant information

SFDR categorisation: Article 8

The Sub-Fund promotes environmental and/or social and governance characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR") and has the SRI label (framework for the French SRI label published on 01/03/2024). For more information about sustainable finance, please visit the website: <https://www.ofi-invest-am.com/en/sustainable-finance>

Information about the past performance of the Sub-Fund presented over five years, along with calculations of past performance scenarios, is available at: <https://www.ofi-invest-am.com/en/produits>.

The Remuneration Policy and any updates are available at www.ofi-invest-am.com and can also be provided in hard copy format free of charge or on written request sent to the address above.

Ofi Invest Asset Management can only be held liable for statements contained in this document that are misleading, inaccurate or inconsistent with the corresponding sections of the Sub-Fund prospectus.
