Asset management strategy

A preliminary estimate put annualised Q1 2023 US GDP growth at 1.1%, below expectations. Vehicle sales supported consumer spending, but inventories and residential investment hampered growth. In Europe, GDP grew only 0.1% QoQ, probably driven by investment and trade, while inventories and consumption hampered performance. In China, real GDP grew 4.5% year on year, with consumer spending and services both making a significant contribution thanks to the lifting of Covid restrictions. Industrial production bounced back 3.9% in April and exports exceeded expectations, up 14.8% year on year. On the geopolitical front, China carried out a three-day military exercise in the Taiwan Strait in response to the Taiwanese president's visit to the US, and said it would keep up the pressure. On the central bank front, current data points to a further rate hike at the ECB's next meeting, with Christine Lagarde stressing the importance of adapting monetary policy to take account of climate change. As regards the Fed, a further 25 bps hike should be enough to bring the current monetary tightening cycle to an close. Lastly, the BoJ maintained its policy unchanged while indicating that it might change its yield curve control policy over the coming months.

Against this backdrop, European equity markets ended April higher, with earnings season proving rather satisfactory: the Stoxx 600 gained 2.4%, the CAC 40 3% and the banking sector 1.6%, despite sector tensions in the US, while the S&P 500 gained 1.5%. In credit, the 5-year Crossover remained flat at 438 bps, with German 10-year yields moving very little (up 2 bps to 2.31%). In currencies, the euro continued to gain ground against the US dollar (up 1.7%) but lost ground against the Swiss franc (down 0.7%) and sterling (down 0.3%). In European convertible bonds, the Refinitiv Global Focus Convertibles HdG index in euros gained a modest 0.27% in the month, while OFI Invest ESG European Convertible Bond gained 0.36% over the same period.

The European primary market slowed sharply in the month as a result of earnings season, with issues totalling only €600 million, via two new entrants to the asset class, Nordex 4.25% 2030 (€333m; Germany; energy) and Voestalpine 2.75% 2028 (€250m; Austria; basic resources). This brings European issues in the year to date to €5.9 billion – as much as was issued in the whole of 2022.

The quarterly update of SRI ratings (April) saw Mercedes-Benz, Primary Health Property and Safran watchlisted (we kicked off engagement processes for these issuers), BE Semiconductor, Delivery Hero, Dufray and Nexi downgraded to "Uncertain", Iberdrola and Volvo AB downgraded to "Follower" and Genfit downgraded to "Committed". Note also that Accor and Pharming were upgraded to "Follower", DiaSorin, Evonik and Sika to "Committed" and Sanofi and Umicore to "Leader".

As regards performance, the main negative contributors were STM 2025 and 2027 (-47 bps overall; down 12.5% and 13.1% respectively), Rémy Cointreau 2024 (-8 bps; down 4.6%), Sika 2025 (-7 bps; down 3.8%) and Prysmian 2026 (-4 bps; down 2.1%). Conversely, the top positive contributors were Crédit Agricole call 2024 (+13 bps; up 43.9%), Symrise shares (+10 bps; up 9.2%), Figeac 2027 (+9 bps; up 5.1%), Delivery Hero 2028 (+9 bps; up 3.5%), Volvo AB 2024 (+7 bps; up 3.9%) and Société Générale call 2024 (+6 bps; up 22.6%).

The only change in the month was the sale of Pirelli 2025. The engagement process initiated in Q4 2022 (when the security in question was watchlisted) culminated in a bonus being awarded following our discussions with management. Unfortunately, this was not enough for the security to change SRI category. In accordance with our investment process, the entire holding was sold. At the month-end, the top two SRI categories (Leader and Committed) accounted for 48% of investments and the cash position was 3%.

Portfolio equity sensitivity was 45% at end April, the current yield was 0.90% for an average maturity of 3.8 years and the modified duration was 1.58.

SCR informations

The aggregate SCR represents the total of all underlying risks. It does not take into account the effects of diversification.

The SCR Market represents the capital requirement taking into account the various risk factors (see correlation matrix arising under regulation n°2015/35).
