

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Ofi Invest Precious Metals

Legal entity identifier:

9695006JSN03RE8RMG80

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic Sustainable activities. investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?				
● □ Yes	●○ ⊠ No			
☐ It made sustainable investments with an environmental objective:%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments			
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy			
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy			
	☐ with a social objective			
☐ It made a minimum of sustainable investments with a social objective:%	☑ It promoted E/S characteristics, but did not make any sustainable investments			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Ofi Invest Precious Metals (hereinafter the "Sub-Fund") promoted environmental and social characteristics by implementing the systematic approach linked to incorporation of ESG criteria through various requirements.

In fact, the Sub-Fund has invested in order to gain exposure to the Basket Precious Metals Strategy Index composed of the following metals: gold, silver, platinum and palladium. The Management Company also calculated the carbon footprint in order to estimate the number of offsetting certificates required to offset this emission. And lastly, 20% of public issuers lagging the furthest behind in managing ESG issues, belonging to what is known as the "Under Supervision" category, were excluded from the Sub-Fund's investment universe.

How did the sustainability indicators perform?

As at 31 December 2024, the performance of the sustainability indicators used to measure attainment of the Sub-Fund's environmental and social characteristics was as follows:

Regarding the carbon offsetting mechanism:

- Greenhouse gas (GHG) emissions associated with the basket of commodities that make up the index are 273,014.885 tonnes of CO2;
- The number of certified Voluntary Emission Reductions (VER) acquired in order to offset GHG emissions is 35,915, which was an offsetting of 13.15% of the Sub-Fund's emissions.

For the proportion of assets invested in government bonds of OECD countries:

- **ESG rating:** the portfolio's ESG rating for public issuers stands at **8.04** out of 10 and the ESG rating for its reference benchmark is **7.80**;
- The percentage of excluded public issuers lagging the furthest behind in terms of ESG belonging to the "Under Supervision" category: 20%.

Monitoring of the indicators, mentioned previously, in management tools allows confirmation that there were no significant variations in the performance of the indicators throughout the reporting period in question, between 30 December 2023 and 31 December 2024.

For more information on these sustainability indicators and their calculation method, please refer to the Sub-Fund's Prospectus and Pre-Contractual Template Annex.

...and compared to previous periods?

As at 29 December 2023, the performance of the sustainability indicators used to measure attainment of the Sub-Fund's environmental and social characteristics was as follows:

Regarding the carbon offsetting mechanism:

- Greenhouse gas (GHG) emissions associated with the basket of commodities that make up the index were 380,842.12 tonnes of CO2;
- The number of certified Voluntary Emission Reductions (VER) acquired in order to offset GHG emissions was 56,427, which was an offsetting of 14.82% of the Sub-Fund's emissions.

For the proportion of assets invested in government bonds of OECD countries:

- ESG rating: the portfolio's ESG rating for public issuers stands at 7.57 out of 10 and the ESG rating for its reference benchmark was 6.87;
- The percentage of excluded public issuers lagging the furthest behind in terms of ESG belonging to the "Under Supervision" category: 20%.

Monitoring the indicators, as mentioned previously, in management tools provides confirmation that there were no significant variations in the performance of the indicators throughout the reporting period in question, between 1 January 2023 and 29 December 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating environmental, social and employee matters, respect for human rights, anti-corruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Adverse ir	npact indicator	Metric	Impact [year n]	Impact [year n-1]	Explanation	Actions taken, and actions planned and targets set for the next reference period
	Indicators applicable to investments in sovereigns and supranationals					
			162.76 (tCO2e/million EUR)	178.49 (tCO2e/million EUR)		Countries' MSCI rating: Consideration of GHG intensity in exposure to environmental risks, in the sub-factor: "environmental
Environment	15. GHG intensity	GHG intensity of investee countries	Coverage rate = 100%	Coverage rate = 100%	Please refer to the "Statement on Principal Adverse	environmental performance" ("GHG intensity trend" data point). Additional measures defined in 2024: convergence of the funds' ESG monitoring indicators with principal adverse impacts (PAIs).
			0.00	0.00	Impacts of Investment Decisions on Sustainability Factors", which is	Proprietary ESG rating of countries (non-emerging countries): this indicator is taken into account in the analysis of the following issue: "Employment and the
Social	16. Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	Coverage rate = 100%	Coverage rate = 100%	available on the Management Company's website	labour market". This rating applies a penalty for countries on the Freedom House list, updated annually in its report on (civil and political) freedoms worldwide, and for those countries that have not abolished the death penalty. Proprietary ESG rating of emerging countries: this indicator is taken into account in the "civil liberties" score awarded by the NGO Freedom House (measures the level of civil liberties in a country: absence of slavery and forced labour, absence

			of torture and killing; right to freedom and security, a fair trial, personal defence, privacy; freedom of consciousness, expression, assembly and to form associations; etc.).
			Countries' MSCI rating: Consideration of social violations in the following sub-factor: "Wellness" (data point "Labour rights") and "Civil and political freedoms" (data points: political rights, civil freedoms).

For more information, please refer to the "Statement on Principal Adverse Impacts of Investment Decisions on Sustainability Factors", which is available on the Management Company's website at <a href="https://www.ofi-invest-number-nu am.com/finance-durable.

What were the top investments of this financial product?

As at 31 December 2024, the Sub-Fund's top investments were as follows:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Asset	Weight	Country	Sector
EDERAL SUPPORT MONETAIRE ESG SI	15.8%	France	
BFT FRANCE MONETAIRE CT ISR -12 E	15.5%	France	
OREAL SA MTN RegS	8.9%	France	Healthcare

BANQUE FEDERATIVE DU CREDIT MUTUEL MTN RegS	4.4%	France	Finance
AYVENS SA RegS	4.4%	France	Industry
BMW FINANCE NV MTN RegS	4.3%	Germany	Consumer discretionary
JNICREDIT SPA MTN RegS	4.2%	Italy	Finance
BANCO SANTANDER SA RegS	3.3%	Spain	Finance
SNAM SPA MTN RegS	3.2%	Italy	Utilities
1IZUHO FINANCIAL GROUP INC MTN RegS	3.2%	Japan	Finance
BANQUE FEDERATIVE DU CREDIT MUTUEL MTN RegS	3.2%	France	Finance
SOCIETE GENERALE SA RegS	2.9%	France	Finance
/INCI SA MTN RegS	2.3%	France	Industry
NG GROUP NV RegS	2.2%	Netherlands	

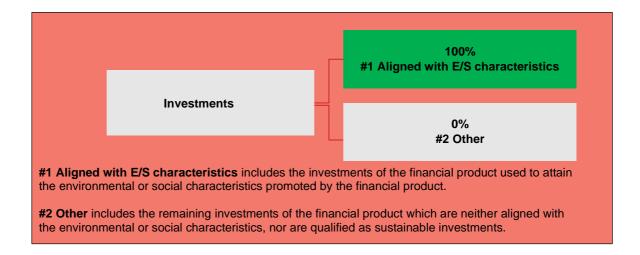

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31 December 2024, **100%** of the net assets of the Sub-Fund are made up of investments contributing to the promotion of environmental and social characteristics (#1 Aligned with E/S characteristics).

0% of the net assets of the Sub-Fund are in the #2 Other category. This category is made up of:

- 0% in cash;
- 0% in derivatives.

The Sub-Fund therefore complied with the expected asset allocation:

- A minimum of 80% of the Sub-Fund's net assets belonging to the category #1 Aligned with E/S characteristics;
- A maximum of 20% of investments in the #2 Other category will consist of cash and derivatives.

In which economic sectors were the investments made?

As at 31 December 2024, the sector-based breakdown of assets invested is as follows:

OFI INVEST PRECIOUS METALS	
Finance	35.7%
Other	31.4%
Consumer discretionary	9.4%
Healthcare	8.9%
Industry	6.6%
Utilities	5.8%
Information technology	2.2%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As at 31 December 2024, the share of sustainable investments with an environmental objective aligned with the EU Taxonomy in the portfolio is nil.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

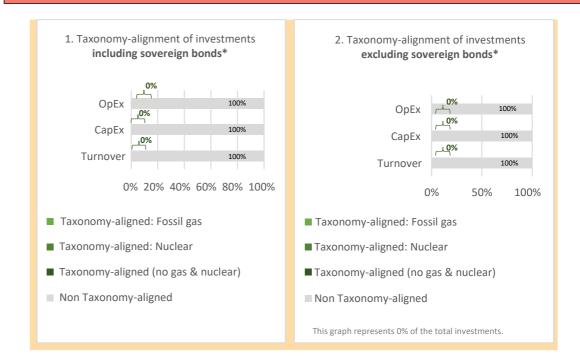

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?
- ☐ Yes
 - ☐ In fossil gas
 - ☐ In nuclear energy
- ⊠ No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2024, the share of investments in transitional and enabling activities in the portfolio is nil.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As at 31 September 2024, the share of the Fund's investments that were aligned with the EU Taxonomy remains nil.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with

environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the minimum share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

These investments, which were only made in specific situations, consisted of:

- cash:
- · derivatives.

Although this category does not have an ESG score and no minimum environmental and social guarantees were implemented, its use did not have the effect of significantly or permanently distorting the environmental and/or social characteristics promoted by the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and/or social characteristics during the reference period, all ESG data were made available to managers in the management tools, and the various ESG requirements were configured and tracked in these same tools.

How did this financial product perform compared to the reference benchmark?

the financial

product attains the environmental or social characteristics that they
