The French Financial Markets Authority (Autorité des Marchés Financiers - AMF) is responsible for supervising Ofi Invest Asset Management in relation to this Key Information Document.
 Ofi Invest Asset Management is authorised (under no. GP-92-12) and regulated by the AMF.

This PRIIP is authorised for marketing in Germany, Austria and Italy, and regulated by the German Federal Financial Supervisory Authority (BAFIN), the Austrian Financial Markets Authority (FMA) and the Italian Companies and Exchange Commission (CONSOB).
 Date of production of the KID: 21/07/2025

What is this product?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS) under French law, created in the form of a Sub-Fund (hereinafter the "Sub-Fund").

Term: There is no maturity date for this product, although it was created with a term of 99 years. It may be liquidated or merged with another fund under the conditions set out in the Sub-Fund's regulations.

Objectives: This key information document only sets out the objectives of the Ofi Invest ESG Euro Equity sub-fund of the Global SICAV fund.

As the assets and liabilities of the SICAV's sub-funds are segregated, investors in each sub-fund cannot be affected by sub-funds to which they have not subscribed. Investors may not trade their shares in one sub-fund for shares in another sub-fund.

The Sub-Fund's objective is to outperform the Euro Stoxx index in the long term over the recommended investment period, while also adopting an SRI approach.

Simultaneous with the financial analysis, the manager complements their study with an analysis of non-financial criteria in order to make the best selection of securities for the portfolio. The proportion of ESG-analysed securities in the portfolio must be greater than 90% of the fund's net assets (excluding cash, UCIs and derivatives).

The management adopts a "rating improvement" ESG approach, which involves achieving a higher average ESG score for the portfolio than the average ESG score for the SRI comparison universe, including the securities that make up the Euro Stoxx Total Market Index (BKXE), after removing 30%, as a weighting, of the index's securities. These eliminated securities correspond to the exclusion of private issuers featuring on the management company's sector-based and norm-based exclusion lists for the purposes of the SRI Label, as well as securities with the lowest ESG scores.

Under the SRI Label, the portfolio is committed to outperforming two non-financial indicators (an environmental indicator (PAI indicator 3) and a social indicator (PAI indicator 11)), compared to its SRI universe.

The ESG analysis of issuers is performed using a dedicated proprietary tool for automating the quantitative processing of ESG data, combined with a qualitative analysis by the ESG analysis team. Examples of ESG criteria analysed include carbon emissions, information security policies and Board independence. The main methodological limitations of the Mutual Fund's non-financial strategy are those faced by Ofi Invest Asset Management when developing its ESG rating model (problem associated with non-disclosure or incomplete disclosure of information by some companies, and problem with the quantity and quality of the ESG data that need to be processed).

A minimum of 60% of the assets of Ofi Invest ESG Euro Equity are exposed in eurozone shares or similar equities, with 90% of the net assets permanently invested in shares of companies which have their registered offices in a European Union Member State.

The Sub-Fund may invest in futures traded on French and foreign regulated markets and/or over-the-counter. In this context, the manager may take positions with a view to hedging the portfolio against and or exposing it to shares, securities and similar securities and indices, to take advantage of market variations or to attain the management objective.

The Sub-Fund may in particular operate on futures contracts and options (sale, purchase, in-the-money or out-of-the-money) concerning the Euro Stoxx index. Moreover, the manager may take positions with a view to hedging the portfolio against a potential foreign exchange risk. The portfolio's exposure should not be more than 100%.

Benchmark index: The Sub-Fund's performance can be compared with the performance of the Euro Stoxx stock index. It is calculated on the basis of reinvested dividends. The Euro Stoxx index is the subset of the most liquid names in the Stoxx Europe 600 Index. The index has a variable number of components (around 300) and represents large, medium-sized and small capitalisations in eurozone countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. Bloomberg ticker: SXST Index. However, the Sub-Fund's objective is not to reproduce, in one way or another, the performance of this index.

Subscription and redemption procedures: Investors may subscribe to their shares, either as an amount or as a number of shares, and redeem their shares, as a number of shares, on request, on each valuation day, from IZNES (directly registered shares) and from Société Générale (by delegation by the Management Company for managed bearer or registered shares). Subscription and redemption requests are centralised on each valuation day up to 12:00 pm and are executed based on the next net asset value. The corresponding payments are made on the second non-holiday trading day following the net asset value date applied. For subscriptions or redemptions that go through another institution, additional time for routing these orders is required for instructions to be processed. The net asset value is calculated on each non-holiday trading day in Paris and is dated that same day.

Intended retail investor: This C share class in the Sub-Fund is aimed at all subscribers with a minimum initial subscription amount of €500,000, who are looking to invest on eurozone share markets. This investment is recommended for potential investors who are seeking an investment horizon of at least five years. Capital is not guaranteed for investors, who should be able to bear losses equal to their total investment in the Sub-Fund. The Sub-Fund's shares are not available for subscription by US Persons (see the "Intended subscribers and profile of the typical investor" section in the prospectus). This share accumulates its distributable amounts.

Recommendation: the recommended holding period is five years. This Sub-Fund may not be suitable for investors who plan to withdraw their contribution before five years have elapsed.

Depositary: SOCIETE GENERALE PARIS

Further information (prospectus, annual report and the half-yearly report), along with information on other share classes, is available free of charge, in French, at the address below. This information may also be sent by post within one week on written request from the investor sent to:

Ofi Invest Asset Management
 Direction Juridique
 127-129 quai du Président Roosevelt – 92130 Issy-les-Moulineaux - France

The Sub-Fund's net asset value is available on the AMF website (www.amf-france.org) and on the Management Company's website (www.ofi-invest-am.com)

What are the risks and what could I get in return?

Summary Risk Indicator:

The risk indicator assumes you keep the product for the recommended holding period. The actual risk can vary if you cash in before the recommended holding period and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class; in other words, the potential losses from future performance of the product are medium, and if market conditions were to deteriorate, it is unlikely that our capacity to pay you would be affected. This product does not expose you to any additional financial obligations or liabilities. This product does not include any protection from future market performance, so you could lose some or all of your investment.

Other materially relevant risks not included in the Summary Risk Indicator are:

- Credit risk: the issuer of a debt security held by the Sub-Fund is no longer able to make the coupon payments or repay the capital.
- Liquidity risk: the potential major impact on asset prices when a financial market is unable to absorb transaction volumes.
- Counterparty risk: the investor is exposed to the risk of a counterparty defaulting or being unable to meet its contractual obligations as part of an over-the-counter transaction.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over one year and the recommended investment period. They are based on a minimum history of ten years. If the history is insufficient, it is supplemented on the basis of assumptions made by the management company. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Example Investment: €10,000		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	€3,772	€3,185
	Average return each year	-62.28%	-20.50%
Unfavourable	What you might get back after costs	€7,754	€9,833
	Average return each year	-22.46%	-0.33%
Moderate	What you might get back after costs	€10,433	€13,330
	Average return each year	4.33%	5.92%
Favourable	What you might get back after costs	€14,006	€16,951
	Average return each year	40.06%	11.13%

The scenarios are based on an investment (compared to historical net asset values) made:

- between 30/09/2017 and 30/09/2022 for the unfavourable scenario;
- between 31/01/2016 and 31/01/2021 for the moderate scenario;
- between 31/03/2020 and 31/03/2025 for the favourable scenario.

What happens if the PMC is unable to pay out?

The Sub-Fund is a collective financial instrument investment and deposit vehicle, which is separate from the Management Company. Should there be a default by the Management Company, the Sub-Fund assets held by the depositary will not be affected. En cas de défaillance du dépositaire, le risque de perte financière du Compartiment est atténué en raison de la ségrégation légale des actifs du dépositaire de ceux du Compartiment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- €10,000 is invested;
- In the first year you would get back the amount that you invested (0% annual return);
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Costs over time (for an investment of €10,000):

	If you exit after 1 year	If you exit after 5 years
Total costs	€328	€1,092
Annual cost impact (*)	3.30%	1.82% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.73% before costs and 5.92% after costs.

Composition of Costs

One-off costs upon entry or exit	Annual cost impact if you exit after 1 year	
Entry costs	2.0% maximum of the amount you pay in when entering this investment. This is the maximum amount that may be deducted from your capital before it is invested. In some cases, you may pay less.	Up to €197
Exit costs	There are no exit costs for this product.	None
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.10%. This is an estimate based on actual costs over the last financial year ended December 2024. This figure may vary from one financial year to the next.	€110
Transaction costs	0.21% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€21
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	None

How long should I hold the UCI and can I take money out early?

Recommended holding period: 5 years

You can redeem your investment at any time. However, the recommended holding period as shown is intended to minimise your risk of capital loss in the event of redemption before this period, although this does not constitute a guarantee.

How can I complain?

For any complaints relating to the Sub-Fund, subscribers may consult their adviser or contact Ofi Invest Asset Management:

- either by post: Ofi Invest Asset Management - 127-129 quai du Président Roosevelt - 92130 Issy-les-Moulineaux - France
- or by e-mail directly at the following address: contact.clients.am@ofi-invest.com or on the website: www.ofi-invest-am.com

If you are not satisfied with the response given, you may also refer the matter to the AMF Ombudsman via www.amf-france.org (mediation section), or write to the following address: Médiateur de l'AMF, Autorité des Marchés Financiers, 17 place de la Bourse, 75082 Paris Cedex 02.

Other relevant information
