KID published: 17/03/2023

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type: UCITS (Bonds and other debt securities denominated in Euro)

Term: 2 years

Objectives: This key information document only sets out the objectives of the Ofi Invest ESG Euro Investment Grade Climate Change sub-fund of the Global SICAV fund. As the assets and liabilities of the SICAV's sub-funds are segregated, investors in each sub-fund cannot be affected by sub-funds to which they have not subscribed. Investors may not trade their shares in one sub-fund for shares in another sub-fund.

The Fund's objective is to outperform the Bank of America Merrill Lynch Euro Corporate Index by investing in companies with an active approach to the energy and environmental transition.

The investment strategy aims to construct a portfolio of bonds made up of bonds issued in euros by companies whose registered offices are mainly based in an OECD Member State. The initial universe is exclusively made up of Investment Grade bond securities (as per OFI AM's rating policy) issued in euros by companies. Should a security be downgraded, the Sub-Fund may hold up to 10% maximum of its net assets in securities with a "Speculative High Yield" rating.

The Sub-Fund applies two parallel selection processes to the financial analysis. One of these processes factors in the overall ESG performance of the issuers and the other factors in the carbon performance of issuers from carbon-intensive sectors. Please note that these two selection processes apply only to the main eligible assets in the Sub-Fund, i.e. bonds and other debt securities, as well as credit derivatives (issuer CDS), representing between 80% and 100% of the Sub-Fund's net assets.

Analysis of non-financial criteria: Alongside the financial analysis, as part of their study, the manager also analyses non-financial criteria in order to commit to a "Socially Responsible Investment" (SRI) selection of portfolio companies. The non-financial analysis or rating carried out will cover at least 90% minimum of the portfolio's securities.

Energy and environmental transition analysis: The Sub-Fund pursues a strategy of promoting the private issuers which are taking the most active role around the Energy Transition.

The universe of business sectors that produce high levels of greenhouse gas emissions will be analysed based on two main criteria: the Carbon Intensity of the company's activities and how great a role the company is playing in the Energy Transition.

The portfolio is mainly invested in bonds and other debt securities denominated in euros: fixed-rate and/or floating-rate bonds, and/or indexed bonds, and/or convertible bonds. The portfolio may also include convertible bonds (resulting in indirect exposure to equity markets) and subordinated securities. These securities are issued or guaranteed by corporate or financial companies incorporated mainly in an OECD Member State and secondarily outside the OECD area. The portfolio will not be invested in government securities.

Within the restrictions set out in regulations, the Sub-Fund may invest in financial contracts (swaps, futures or options) traded on French and foreign regulated and organised markets and/or over-the-counter, in order to hedge against and/or expose itself to equity, interest rate, credit and currency risks.

Investors will be able to compare the Sub-Fund's performance with the performance of the Bank of America Merrill Lynch Euro Corporate Index, an index published by Merrill Lynch made up of Investment Grade bonds denominated in euros issued by both financial and non-financial companies.

Investors may subscribe to or redeem their shares on request from OFI INVEST ASSET MANAGEMENT (directly registered shares) or from SOCIETE GENERALE (by delegation by the Management Company for managed bearer and registered shares) every valuation day up to 12:00 (midday). The Management Company shall report annually on the allocation of income and may decide on its capitalisation or its total or partial distribution.

Intended retail investors:

This N share class in the Sub-Fund is reserved for OFI Group Feeder UCIs, which are seeking a bond yield from a portfolio of bonds issued in euros by companies whose registered offices are mainly based in an OECD Member State. It is aimed at investors who are seeking medium-term asset growth (more than 2 years) and are willing to take moderate risks in order to achieve this objective.

The Sub-Fund is aimed at individuals who are sufficiently experienced and have enough financial knowledge to be able to assess the risks associated with the Sub-Fund's profile. Investors accept that they may lose some or all of their assets due to negative performances by their investment.

Insurance: N/A

What are the risks and what could I get in return?

Risk indicator

and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is the low risk class; in other words, the potential losses from future performance of the product are at the low level, and if market conditions were to deteriorate, it is unlikely that our capacity to pay you would be affected.

This product does not expose you to any additional financial obligations or liabilities.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

The risk indicator assumes you keep the product for the recommended holding period. The actual risk can vary significantly if you cash in at an early stage,

Performance Scenarios

Scenarios		1 year	Recommended Holding Period
Stress scenario	What you might get back after cost Average return each year	8351.00 € -16.49 %	7826.31 € -11.53 %
Unfavorable scenario	What you might get back after cost Average return each year	8350.71 € -16.49 %	7826.31 € -11.53 %
Medium scenario	What you might get back after cost Average return each year	10208.03 € 2.08 %	10425.24 € 2.1 %
Favorable scenario	What you might get back after cost Average return each year	10932.74 € 9.33 %	11106.52 € 5.39 %

This table shows the amounts you could get back over the recommended holding period, according to various scenarios, assuming you invest EUR 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios for other products.

The scenarios presented are an estimate of future performance based on past evidence relating to variations in the value of this investment. and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the PMC is unable to pay out?

OFI INVEST ASSET MANAGEMENT is a Portfolio Management Company approved and supervised by the French Financial Markets Authority (AMF). OFI INVEST ASSET MANAGEMENT complies with organisational and operational rules, particularly with regard to equity. In the event of default by OFI INVEST ASSET MANAGEMENT, no legal compensation scheme is envisaged because the UCI's solvency is not called into question. The Depositary ensures the custody and safekeeping of the Fund's assets.

What are the costs?

The total cost includes one-off costs (entry or exit costs) and recurring costs (management costs, portfolio transaction costs, etc.), as well as incidental costs (performance fees and, where applicable, carried interest).

Reduction in Yield (RIY) represents the impact of costs on performance in percentage terms, i.e., the difference between performance excluding costs and performance including costs.

The amounts shown here are the cumulative costs of the product itself for different holding periods (except for UCIs with a recommended holding period of less than one year). They include potential early exit penalties. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.

Costs over time (for an investment of EUR 10,000)

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Scenario investment [10 000 EUR]	If you exit after 1 year	If you exit after the recommended holding period
Total Costs	42.64 €	87.27 €
Impact on yield (RIY) per year	0.43 %	0.43 %

Breakdown of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period
- The meaning of the different cost categories

It shows the impact on return each year.

One-off costs (distribution costs, structuring costs, marketing costs, subscription costs (including taxes))	Entry costs	1%	The impact of the costs you pay when entering your investment (this is the most you will pay, and you could pay less) And/or where the costs are embedded in the price, for instance, in the case of PRIIPs other than investment funds. The impact of costs already included in the price. This is the most you will pay, and you could pay less. Where distribution costs are included in entry costs, this includes the costs of distributing your product.
	Exit Costs	N/A	The impact of the costs of exiting your investment when it matures.
Recurring costs (unavoidable operating costs of the UCI, all payments, including remuneration related to the UCI or providing services to it, transaction costs)	Portfolio transaction costs	0.23%	The impact of the costs incurred when we buy and sell investments underlying the product.
	Other recurring costs	0.19%	The impact of the costs that we charge each year for managing your investments and the costs set out in Section II.
Incidental costs (performance fees paid to the manager or investment advisers where applicable, and possibly carried interest if the UCI provides for this)	Performance Fees	0.04%	The impact of the performance fee. We deduct this fee from your investment if the product outperforms its benchmark corresponding to 20% of outperformance above the benchmark Bank of America Merrill Lynch Euro Corporate Index.

How long should I hold the UCI and can I take my money out early?

Recommended holding period: 2 years

We are of the view that the recommended holding period is ideal for the UCI to optimise benefit from the income from this type of instrument.

You may redeem your investment at any time; however, the recommended holding period opposite is intended to minimise your risk of capital loss in the event of redemption before this period, even though it does not constitute a guarantee.

How can I make a complaint?

For any complaint relating to the UCI, the subscriber may consult their adviser or contact OFI INVEST ASSET MANAGEMENT.

- Either by post: OFI INVEST ASSET MANAGEMENT - 22 rue Vernier - 75017 PARIS
- Or directly via the website at the following address: contact.clients.am@ofi-invest.com

If, following your complaint, you are not satisfied with the response provided by the OFI Group, you may also contact the AMF Ombudsman via the following link: www.amf-france.org or write to the following address: Médiateur de l'AMF, Autorité des Marchés Financiers, 17 place de la Bourse, 75082 Cedex 02.
