promoted by the
financial product are
attained .

with

aligned

Taxonomy or not.

Ofi Invest ESG Asia EM ex-China, previously known as Ofi Invest ESG Global Emerging Equity, (the « **Sub-Fund** ») promoted environmental and/or social characteristics through two systematic approaches :

- 1. Normative and sectoral exclusions;
- 2. A set of ESG requirements.

Indeed, the Sub-Fund has excluded from the investment universe the 20% of securities which did not have the best sustainable and socially responsible investments ratings compared to the other securities which have been selected.

How did the sustainability indicators perform ?

As of December 29, 2023, the performance of the sustainability indicators used to measure the Funds environmental and social performance is as follows:

- SRI score: the SRI score of the portfolio has reached 3,49 out of 5 compared to its benchmark whose SRI score is 3,9 out of 5;
- The percentage of the investee companies falling in the exclusion criteria of the companies "under-surveillance": 0%

The monitoring of the above-mentioned indicators in the management tools makes it possible to affirm that there were no significant variations in the performance of the indicators throughout the reporting period considered, between January 1st, 2023, and December 29, 2023.

For more information on these sustainability indicators and their calculation method, please refer to the Sub-Fund's prospectus and its precontractual annex.

... and compared to previous periods ?

As of December 30, 2022, the performance of the sustainability indicator to measure the achievement of the environmental and/or social characteristics of the Fund was as follows:

• ESG score: the ESG score at portfolio level has reached 3,36 out of 5 and the ESG score of its benchmark was 2,52 out 5;

As part of the SRI Label awarded to the Sub-Fund, two ESG indicators promoting social and environmental characteristics have been piloted at the level of the Fund and its benchmark. Their respective performances as of December 30, 22 were as follows:

- 1. The share of controversial issuers considers to be in violation of at least one of the 10 Global Compact principles is null (0%) compared to its SRI universe, whose share of controversial issuers considered to be in violation of at least one of the 10 Global Compact principles is 0,15%.
- 2. The share of women on the Board of Directors or Supervisory Board of the beneficiary companies is **0,19%** compared to its universe, whose share is **0,14%**.

The monitoring of the above-mentioned indicator in the management tools makes it possible to affirm that there were no significant variations in the performance of the indicators throughout the reporting period considered, between January 1st, 2022, and December 30th, 2022.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating environmental, social and employee matters, respect for human rights, anticorruption antibribery and matters

How did the sustainable investments not cause significant harm to any sustainable investment objective ?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business Human Rights? Details:

The EU Taxonomy sets out a "do not significant harm" principe by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significantly harm" principle applies only to those investiments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

What were the top investments of this financial product?

As of December 29, 2023, the Fund's main investments were as follows :

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period.

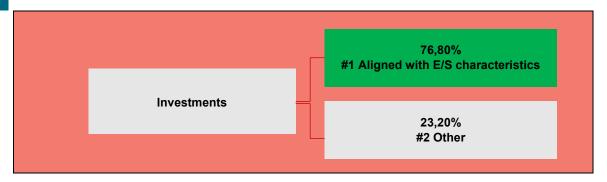

Largest investments	Sector	% of assets	Country
TAIWAN SEMICONDUCTOR MANU	Technology	8,9895%	Taiwan
SAMSUNG ELECTRONICS	Telecommunications	7,4074%	South Korea
ICICI BANK	Banks	4,2422%	India
ALIBABA GROUP HLDG	Retail	3,2829%	China
BMFBOVESPA	Financial Services	3,1106%	Brazil
MICROSOFT	Technology	3,0035%	United States
ZIJIN MINING GROUP	Basic resources	2,8277%	China
INFOSYS TECHNOLOGIES	Technology	2,6025%	India
ECLAT TEXTILE	Core Resources	2,5861%	Taiwan
ADOBE SYSTEMS	Technology	2,3151%	United States
GRUPO FINANCIERO BANORTE	Banks	2,2765%	Mexico
RELIANCE INDS-SPONS GDR 144A	Energy	2,2437%	India
FEMSA	Food, drink and tobacco	2,1939%	Mexico
LOCALIZA RENT A CAR	Consumer products and services	2,0086%	Brazil
BANCO BRADESCO	Banks	1,9817%	Brazil

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power of low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transactional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

As of December 29, 2023, the Sub-Fund had **76,80%** of its net assets investments promoting environmental and social characteristics (#1 Aligned with E/S characteristics).

The Sub-Fund had **23,20**% of its net assets investments were neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments #2 Other. These investments consisted of :

- 17,49% of liquidities/cash;
- 0,13% of deriatives;
- 5,58% of equity securities in the portfolio that do not have an ESG score.

Therefore, the Fund has not complied with the planned asset allocation:

- A minimum of 80% of the Fund's investments (including at least 90% of the stock equities invested in) belonging to pocket #1 Aligned with E/S characteristics pocket;
- A maximum of 20% of its investments belonging to #2 Other, including a maximum of 10% in non ESG-rated stocks or securities and a maximum of 10% in cash and/or cash equivalent (excluding monetary UCIs classified as article 8 according to SFDR) held for liquidity purposes or derivatives.
- In which economic sectors were investments made?

As of December 29, 2023, the sectoral breakdown of invested assets was as follows:

Sector	% of assets
Dispo/Invested liquidity	19,20%
Technology	21,71%
Banks	13,80%
Telecommunications	10,24%
Basic resources	7,51%
Retail	4,69%
Energy	3,78%
Consumer goods and services	3,50%
Industrial goods and services	3,37%
Food, drink and tobacco	3,37%
Financial Services	3,11%
Insurance	2,95%
Travel and leisure	1,60%
Real estate	0,90%
CHANGE	-0,01%
Option/Future	0,26%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy ?

As of December 29, 2023, the proportion of sustainable investments with an environmental objective aligned with the Taxonomy in the portfolio was nul.

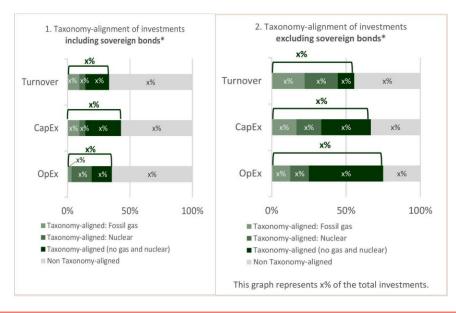

- Did the financial product invest in fossil gas and/or nuclear energy relatid activities complying with the EU Tacxonomy¹?
- ☐ Yes
 - ☐ In fossil gaz
 - ☐ In nuclear energy
- ⊠ No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy;
- operational
 expenditure (OpEx)
 reflecting green
 operational activities
 of investee
 companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of severeign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bons, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities ?

As of December 29, 2023, the proportion of investments in transitional and enabling activities in the portfolio was nul.

How did the percentage of investments that were aligned with the EU Taxonomy compare with the previous reference periods?

As of December 29, 2023, the proportion of investments aligned with the Taxonomy remained null.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin.

The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

sustainable economic activities under Regulation (EU) 2010/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under « other », what was their purpose and were there any minimum environmental or social safeguards?

These investments consisted of:

- cash and/or cash equivalent (excluding monetary UCIs classified as Article 8 according to SFDR and managed by Ofi Invest AM);
- derivatives ;
- non ESG-rated assets.

Although this category does not have an ESG rating and no minimum environmental and social guarantees have been put in place, its use has not significantly or permanently altered the environmental and/or social characteristics promoted by the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to comply with the environmental and/or social characteristics during the reference period, all ESG data were made available to the managers in the management tools and the various ESG requirements were set and monitored in these same tools.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How did the reference benchmark differ from a board market index ?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

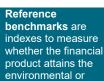

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

social characteristics that they promote.
