## INTRODUCTION

This document (the "GUIDELINE") is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive OFI Basket Energy Strategic Metals Index (the "INDEX"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is calculated, administered and published by Solactive AG ("SOLACTIVE") assuming the role as administrator (the "INDEX ADMINISTRATOR") under the Regulation (EU) 2016/1011 (the "BENCHMARK REGULATION" or "BMR"). The name "Solactive" is trademarked.

*The text uses defined terms which are formatted with "SMALL CAPS. Such Terms shall have the meaning assigned to them as specified in Section 5 (Definitions).*

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

# 1. INDEX SPECIFICATIONS

## 1.1. SCOPE OF THE INDEX

Category	Description
Asset Class	Commodity Futures
Strategy	The INDEX is aimed at replicating the performance of a metals basket necessary to the energy transition to a low carbon economy. At inception, the basket includes copper (14%), nickel (14%), aluminum (12%), zinc (12%), silver (12%), platinum (12%), palladium (8%), gold (8%) and Lead (8%). The exposure to metals is represented by their respective Future Contracts.
Rebalancing Frequency	Quarterly

## 1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Type	RIC	BBG ticker
Solactive OFI Energy Strategic Metals Index	DE000SLOEN60	EUR	Excess Return	.SOOFESM	SOOFESM Index

\*ER means that the Index is calculated as excess return.

The INDEX is published on the website of the INDEX ADMINISTRATOR ([www.solactive.com](http://www.solactive.com)) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

## 1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDEX on the 08/03/2012, the START DATE, is 100. Historical values from the 27/01/2022, the LIVE DATE, will be recorded in accordance with Article 8 of the BMR. Levels of the INDEX published for a period prior to the LIVE DATE have been back-tested.

## 1.4. PRICES AND CALCULATION FREQUENCY

The level of the INDEX is calculated once for each CALCULATION DAY based on the SETTLEMENT PRICES on the EXCHANGES on which the INDEX COMPONENTS are listed.

## 1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by SOLACTIVE.

## 2. INDEX SELECTION

On each SELECTION DAY, the SELECTION PARTY will revise the composition of the INDEX.

In a first step, the SELECTION PARTY determines the INDEX UNIVERSE in accordance with Section 2.1. The INDEX UNIVERSE comprises all those financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS (as specified in Section 2.1.) and will constitute a starting pool from which the components of the Index will be selected. Based on this INDEX UNIVERSE, the new composition of the INDEX will be determined by applying the rules outlined in Section 2.2.

### 2.1. INDEX UNIVERSE REQUIREMENTS

The INDEX UNIVERSE is comprised of financial instruments which fulfill the below requirements (the "INDEX UNIVERSE REQUIREMENTS"):

To be eligible for potential Index inclusion, each final instrument must have:

- 1) A primary listing in one of the countries that are part of the Developed or Emerging Markets as defined by the Solactive Country Classification (see <https://www.solactive.com/documents/>)
- 2) Commodity must be considered by the SELECTION PARTY as necessary to the energy transition to a low carbon economy. Commodities will be considered as such if they are part of one or more of the technologies defined as contributing to the energy transition in the European " Taxonomy" described in the text EU 2020/852.

The INDEX ADMINISTRATOR has outsourced the determination of the INDEX UNIVERSE to the SELECTION PARTY. Such outsourcing has been made in accordance with the requirements of the BMR (Article 10 BMR).

### 2.2. SELECTION OF THE INDEX COMPONENTS

The index components and their weightings will be annually determined by an ADVISORY COMMITTEE. This committee will be set once a year in November. It will be composed at minimum of one member of the management team, one member of the SRI team and one member of the risk management team of OFI AM. The committee will also have the possibility to invite external experts at its convenience.

The members of the ADVISORY COMMITTEE are disclosed by the SELECTION PARTY on the website [www.ofi-am.fr/ETM\\_committee/](http://www.ofi-am.fr/ETM_committee/). The advisory committee will review the available low carbon technologies as defined by the "Taxonomy" regulation, considering the one newly included and the one excluded, and list the metals that are needed to develop these technologies. All these metals will be eligible as INDEX COMPONENTS.

The advisory committee will also present supply and demand fundamentals for each of the INDEX COMPONENTS. Based on these data, the ADVISORY COMMITTEE will decide which metals should be included in the portfolio, and their weightings.

At the end of the ADVISORY COMMITTEE, a publicly accessible report will be written and published on the OFI AM website, giving all the information that led the committee to make its decision.

The INDEX ADMINISTRATOR has outsourced the selection of INDEX COMPONENTS to the SELECTION PARTY. Such outsourcing has been made in accordance with the requirements of the BMR (Article 10 BMR). Any discretionary decision of the SELECTION PARTY will be made in accordance with the specifications regarding the exercise of discretion or expert judgement established by the INDEX ADMINISTRATOR.

## 2.3. WEIGHTING OF THE INDEX COMPONENTS

On the START DATE, weighting of the INDEX COMPONENTS will be as defined in Section 6.1.

On each SELECTION DAY, the SELECTION PARTY communicates to the INDEX ADMINISTRATOR the weighting for each INDEX COMPONENT. The INDEX is then adjusted over the REBALANCE PERIOD.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DATE on the SOLACTIVE webpage under the section "Announcement", which is available at <https://www.solactive.com/news/announcements/>.

An UNSCHEDULED REBALANCING is triggered if the DAILY TRACKING WEIGHT of any INDEX COMPONENT is larger than the DAILY TRACKING WEIGHT THRESHOLD.

If UNSCHEDULED REBALANCING has been triggered less than 10 CALCULATION DAY before a SCHEDULED REBALANCING, the SCHEDULED REBALANCING will not be performed.

### 3. CALCULATION OF THE INDEX

#### 3.1. INDEX FORMULA

The INDEX is calculated as an excess return Index.

The Index level  $I_t$  on each CALCULATION DAY  $t$  is calculated in accordance with the following formula:

If  $t$  is the START DATE:

$$I_t = 100$$

Else:

$$I_t = I_{t-1} * \left( 1 + \frac{EURUSD_{t-1}}{EURUSD_t} * \left( \frac{I_{USD,t}}{I_{USD,t-1}} - 1 \right) \right)$$

Where:

$I_{t-1}$  The Index level on the CALCULATION DAY immediately preceding  $t$ .

$EURUSD_t$  The EUR/USD fx spot fixing published by WM/Refinitiv at 4pm London time.

$I_{USD,t}$  The USD Index level on CALCULATION DAY  $t$ .

#### 3.2. USD INDEX FORMULA

The USD Index level  $I_{USD,t}$  on CALCULATION DAY  $t$  is calculated in accordance with the following formula:

If  $t$  is the START DATE:

$$I_{USD,t} = 100$$

Else:

$$I_{USD,t} = I_{USD,t-1} + \sum_{i=1}^9 [units_{i,t-1}^{lead} * (SP1_{i,t} - SP1_{i,t-1}) + units_{i,t-1}^{next} * (SP2_{i,t} - SP2_{i,t-1})]$$

Where:

$units_{i,t-1}^{lead}$  CONTRACT UNITS on CALCULATION DAY  $t-1$  of the LEAD FUTURE of INDEX COMPONENT  $i$ .

$SP1_{i,t}$  SETTLEMENT PRICE on CALCULATION DAY  $t$  of the LEAD FUTURE of INDEX COMPONENT  $i$ .

$units_{i,t-1}^{next}$  CONTRACT UNITS on CALCULATION DAY  $t-1$  of the NEXT FUTURE of INDEX COMPONENT  $i$ .

$SP2_{i,t}$  SETTLEMENT PRICE on CALCULATION DAY  $t$  of the NEXT FUTURE of INDEX COMPONENT  $i$ .

### 3.3. CONTRACT UNITS FORMULA

The CONTRACT UNITS on CALCULATION DAY  $t$  for an INDEX COMPONENT  $i$  is calculated in accordance with the following formula:

$$\begin{aligned} units_{i,t}^{lead} &= future\_units_{i,t}^{lead} * index\_units_{i,t} \\ units_{i,t}^{next} &= future\_units_{i,t}^{next} * index\_units_{i,t} \end{aligned}$$

Where:

$index\_units_{i,t}$  UNITS of INDEX COMPONENT  $i$  as of CALCULATION DAY  $t$ .

$future\_units_{i,t}^{lead}$  FUTURE CONTRACT UNITS on CALCULATION DAY  $t$  of the LEAD FUTURE of INDEX COMPONENT  $i$

$future\_units_{i,t}^{next}$  FUTURE CONTRACT UNITS on CALCULATION DAY  $t$  of the NEXT FUTURE of INDEX COMPONENT  $i$

Where:

$$\begin{aligned} future\_units_{i,t}^{lead} &= CRW1_{i,t} * \frac{Index_{i,t}}{SP1_{i,t}} \\ future\_units_{i,t}^{next} &= CRW2_{i,t} * \frac{Index_{i,t}}{SP2_{i,t}} \end{aligned}$$

With:

$$Index_{i,t} = future\_units_{i,t-1}^{lead} * SP1_{i,t} + future\_units_{i,t-1}^{next} * SP2_{i,t}$$

The index units are determined according to the following formula:

New index units are determined for each CALCULATION DAY within the REBALANCING PERIOD  $R^i$  (where  $i = 1, \dots, 10$ ).

These units are derived from the respective weights as defined in Section 3.4

If CALCULATION DAY  $t$  falls within a REBALANCING PERIOD:

$$index\_units_{i,t} = WA_{i,R^i} * \frac{I_{USD,t-1}}{Index_{i,t-1}}$$

where:

$WA_{i,R^i}$ : The weight of INDEX COMPONENT as of the  $i$ -th CALCULATION DAY in the REBALANCING PERIOD

Else:

$$index\_units_{i,t} = index\_units_{i,t-1}$$

### 3.4. WEIGHT ALLOCATION FORMULA

The WEIGHT ALLOCATION on CALCULATION DAY  $t$  for an INDEX COMPONENT  $i$  is calculated in accordance with the following formula:

$WA_{i,Target}$  corresponds to the WEIGHT ALLOCATION of INDEX COMPONENT  $i$  as of the latest SELECTION DAY preceding the REBALANCE DATE as defined by the ADVISORY COMMITTEE as per Section 2. The initial WEIGHT ALLOCATIONS are outlined in Section 6.1.

On the first CALCULATION DAY of the REBALANCING PERIOD, the WEIGHT ALLOCATION of INDEX COMPONENT  $i$  and the DAILY TRACKING WEIGHT of each INDEX COMPONENT are used to determine the weighting path.

On each CALCULATION DAY within the REBALANCING PERIOD, one tenth of the difference between the WEIGHT ALLOCATION of INDEX COMPONENT  $i$  and the DAILY TRACKING WEIGHT is rebalanced:

$$WA_{i,R^i} = DTW_{i,R^i-1} + \frac{i}{10} (WA_{i,Target} - DTW_{i,R^i-1}) \text{ for } i = 1, \dots, 10$$

Therefore, on the last CALCULATION DAY within the REBALANCING PERIOD, each INDEX COMPONENT will be assigned its weight as defined by the ADVISORY COMMITTEE

### 3.5. DETERMINATION OF DAILY TRACKING WEIGHTS

On each CALCULATION DAY  $t$ , the DAILY TRACKING WEIGHT of each INDEX COMPONENT is calculated according to the following formula:

$$DTW_{i,t} = \frac{units_{i,t-1}^{lead} \times SP1_{i,t} + units_{i,t-1}^{next} \times SP2_{i,t}}{I_{USD,t}}$$

If the DAILY TRACKING WEIGHT of any INDEX COMPONENT exceeds the DAILY TRACKING WEIGHT THRESHOLD, an UNSCHEDULED REBALANCING is triggered. The REBALANCE PERIOD associated with the UNSCHEDULED REBALANCING will start on the CALCULATION DAY immediately following the CALCULATION DAY where the DAILY TRACKING WEIGHT of any INDEX COMPONENT exceeded the DAILY TRACKING WEIGHT THRESHOLD

No Unscheduled Rebalancing will occur if *CALCULATION DAY  $t$*  is within a pre-existing *REBALANCING PERIOD*

### 3.6. CONTRACT ROLL WEIGHT FORMULA

The CONTRACT ROLL WEIGHT on CALCULATION DAY  $t$  for an INDEX COMPONENT  $i$  is calculated in accordance with the following formula:

If  $t < RS(M_t)$ :

$$CRW1_{i,t} = 1$$

$$CRW2_{i,t} = 0$$

If  $RS(M_t) \leq t \leq RE(M_t)$ :

$$CRW1_{i,t} = \max \left[ 0, 1 - \frac{BD(RS(M_t), t)}{RD} \right]$$

$$CRW2_{i,t} = 1 - CRW1_{i,t}$$

If  $t > RE(M_t)$ :

$$CRW1_{i,t} = 0$$

$$CRW2_{i,t} = 1$$

Where:

$RS(M_t)$  ROLL START DATE of the same month as of CALCULATION DAY  $t$

$RE(M_t)$  ROLL END DATE of the same month as of CALCULATION DAY  $t$

$BD(t_1, t_2)$  Number of CALCULATION DAYS between  $t_1$  (inclusive) and  $t_2$  (inclusive)

$RD$  Total number of roll days, i.e. 10

### 3.7. LEAD AND NEXT FUTURE DETERMINATION

For each INDEX COMPONENT  $i$  the LEAD FUTURE and NEXT FUTURE are determined on a monthly basis. The following table shows the LEAD FUTURE for each INDEX COMPONENT  $i$  for each month of the year. The NEXT FUTURE for a month is the contract given in the table below for the upcoming month.

Month/Index Component i	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
1	Mar	Mar	May	May	Jul	Jul	Sep	Sep	Dec	Dec	Dec	Mar+
2	Mar	Mar	May	May	Jul	Jul	Sep	Sep	Nov	Nov	Jan+	Jan+
3	Mar	Mar	May	May	Jul	Jul	Sep	Sep	Nov	Nov	Jan+	Jan+
4	Mar	Mar	May	May	Jul	Jul	Sep	Sep	Nov	Nov	Jan+	Jan+
5	Mar	Mar	May	May	Jul	Jul	Sep	Sep	Dec	Dec	Dec	Mar+
6	Apr	Apr	Apr	Jul	Jul	Jul	Oct	Oct	Oct	Jan+	Jan+	Jan+
7	Mar	Mar	Jun	Jun	Jun	Sep	Sep	Sep	Dec	Dec	Dec	Mar+
8	Feb	Apr	Apr	Jun	Jun	Aug	Aug	Dec	Dec	Dec	Dec	Feb+
9	Mar	Mar	May	May	Jul	Jul	Sep	Sep	Nov	Nov	Jan+	Jan+

A "+" next to the contract month means it is the contract month of the following year.

### 3.8. ACCURACY

The level of the INDEX will be rounded to eight decimal places for calculation purposes and to four decimal places for publication purposes.

### 3.9. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

### 3.10. MARKET DISRUPTION

A MARKET DISRUPTION EVENT is deemed to have occurred on a CALCULATION DAY  $t$  related to an index Component  $i$  if:

- No settlement price is published by the respective exchange for such CALCULATION DAY  $t$  for the relevant futures contract(s), or
- a limit event has been imposed by the respective exchange by reason of movements exceeding limit up or limit down levels permitted by such respective exchange for such CALCULATION DAY  $t$ .

### 3.11. MARKET DISRUPTION DURING THE REBALANCING PERIOD

If a MARKET DISRUPTION EVENT is deemed to have occurred during the REBALANCING PERIOD, the Index will rebalance all INDEX COMPONENTS for which no MARKET DISRUPTION EVENT is deemed to have occurred and delay the rebalance for any INDEX COMPONENTS for which a MARKET DISRUPTION EVENT is deemed to have occurred until the first day after the INDEX COMPONENTS DISRUPTION PERIOD.

The units for each INDEX COMPONENTS will use the non-tradeable level of the Index and will not be recalculated.

On each CALCULATION DAY where a MARKET DISRUPTION EVENT is deemed to have occurred, a non-tradeable level of the INDEX will be published.

On the first CALCULATION DAY after the DISRUPTION PERIOD (i.e. the first CALCULATION DAY where no MARKET DISRUPTION EVENT is deemed to have occurred), an Adjusted USD Index Level (with USD Index Level as defined in Section 3.2) and consequently an Adjust Index Level (with Index Level as defined in Section 3.1) will be calculated for each CALCULATION DAY within the DISRUPTION PERIOD.

This Adjusted USD Index Level will be using the level of *Index<sub>i</sub>* (as defined in Section 3.3, with  $i$  being the disrupted INDEX COMPONENT) as of the first CALCULATION DAY after the DISRUPTION PERIOD.

## 4. MISCELLANEOUS

### 4.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

### 4.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section "[Announcement](https://www.solactive.com/news/announcements/)", which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

### 4.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

## 4.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 “Methodology Review”) in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

## 4.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the “OVERSIGHT COMMITTEE”) is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

## 5. DEFINITIONS

"ADVISORY COMMITTEE" shall have the meaning as defined in Section 2.2.

"BENCHMARK REGULATION" shall have the meaning as defined in Section "Introduction".

"BMR" shall have the meaning as defined in Section "Introduction".

"CALCULATION DAY" is every weekday where the EXCHANGES are scheduled to be open for trading of all INDEX COMPONENTS.

The "CLOSING PRICE" shall have the meaning as defined in Section 3.6.

The "CONTRACT PRODUCTION WEIGHT" shall have the meaning as defined in Section 3.3.

The "CONTRACT ROLL WEIGHT" shall have the meaning as defined in Section 3.5.

"DAILY TRACKING WEIGHT THRESHOLD" is 20%.

"DISRUPTION PERIOD" is the period of consecutive CALCULATION DAYS where a MARKET DISRUPTION EVENT is deemed to have occurred.

The "EXCHANGES" are the Chicago Mercantile Exchange and the London Metal Exchange.

"GUIDELINE" shall have the meaning as defined in Section "Introduction".

An "INDEX COMPONENT" is any of the futures defined in Section 6.1

"INDEX" shall have the meaning as defined in Section "Introduction".

"INDEX ADMINISTRATOR" shall have the meaning as defined in Section "Introduction".

"INDEX CURRENCY" is the currency specified in the column "Currency" in the table in Section 1.2.

The "LEAD FUTURE" shall have the meaning as defined in Section 3.7.

"LIVE DATE" shall have the meaning as defined in Section 1.3.

The "NEXT FUTURE" shall have the meaning as defined in Section 3.6.

"MARKET DISRUPTION EVENT" shall have the meaning as defined in Section 3.10

"OVERSIGHT COMMITTEE" shall have the meaning as defined in Section 4.2.

A "REBALANCE PERIOD" is the period of 10 CALCULATION DAYS starting on the last CALCULATION DAY of each quarter

A "ROLL START DATE" is the fifth CALCULATION DAY of any month.

A "ROLL END DATE" is the fourteenth CALCULATION DAY of any month.

"SELECTION DAY" is the last CALCULATION DAY of November each year.

"SELECTION PARTY" is OFI AM.

The "SETTLEMENT PRICE" in respect of an INDEX COMPONENT is the official settlement price published by the EXCHANGES.

"SOLACTIVE" shall have the meaning as defined in Section "Introduction".

"START DATE" shall have the meaning as defined in Section 1.3.

"UNSCHEDULED REBALANCING" is a rebalancing which is triggered if the DAILY TRACKING WEIGHT of any INDEX COMPONENT THRESHOLD is exceeding the DAILY TRACKING WEIGHT THRESHOLD

## 6. APPENDIX

### 6.1. INDEX COMPONENTS

At START DATE :

i	Name	Base identifier	Weight Allocation	Conversion Factor
1	Copper Futures	HG	14%	100
2	Nickel Futures	LN	14%	1
3	Aluminum Futures	LA	12%	1
4	Zinc Futures	LX	12%	1
5	Silver Futures	SI	12%	1
6	Platinum Futures	PL	12%	1
7	Palladium Futures	PA	8%	1
8	Gold Futures	GC	8%	1
9	Lead Futures	LL	8%	1
